Quick Start Guide

5.8 GHz Corded/Cordless Telephone/Answering System E5908

with Caller ID & Call Waiting

Installation & setup

After battery installation, place the cordless handset in the charger and allow to charge for at least 16 hours before use. You can keep the battery charged by returning the cordless handset to the charger after each use. When the battery is fully depleted, a recharge takes about 12 hours. The average talk time on a fully charged battery is about five hours depending on environmental conditions, and the standby time is approximately five days.
Press in and downward on the tab to open the battery compartment cover.
Plug the battery connector into the handset.
Place the battery pack and wires in the compartment.

Slide battery compartment cover up until it clicks closed.

Plug power adapter into jack on underside of charger as shown, then plug into an electrical outlet not controlled by a wall switch.

Plug the large power adapter into an electrical outlet not controlled by a wall switch.
Plug long telephone line cord into telephone jack.

Place handset in charger for at least 16 hours before first use.

Plug handset cord into handset and jack at the bottom of the base.

Caution: Use only the supplied rechargeable battery pack or AT&T replacement battery model 3301 (SKU 91076. Part number 80-5071-00-00).

Cordless Handset

SELECT

Press to store a programming option (see page 10), or to store a directory entry in memory (see page 21).
