Quick start guide

**SL82208/SL82308/SL82408
DECT 6.0 cordless
telephone/answering system
with caller ID/call waiting**

Battery installation & charging

Install the battery as shown below. After installing the battery, you can make and receive short calls. For optimal performance, charge the handset battery for at least 16 hours before use. When fully charged, the handset battery provides approximately five hours of talk time and three days of standby time.

Step ❶

Plug the battery securely into the plug inside the handset battery compartment, matching the color-coded label.

Step ❷

Place the battery pack and wires inside the compartment.

Step ❸

Align the cover flat against the battery compartment cover, then slide it upwards until it clicks into place

Step ❹

Charge the handset, by placing the handset face up in the telephone base or in the additional charger. The **CHARGE** light will be on when charging.

IMPORTANT INFORMATION

1. Use only the supplied rechargeable battery or replacement battery (model BT8001). To order, visit our website at **www.telephones.att.com** or call **1 (800) 222-3111.** In Canada dial **1 (866) 288-4268.**

2. See the **Troubleshooting** section in the user's manual for charging issues.

Installation

Your product may be shipped with a protective sticker covering the handset or base display, remove it before use.
Install the telephone base close to a telephone jack and a power outlet not connected to a wall switch. The telephone base can be placed on a flat surface. For optimum range and better reception, place the telephone base in a high and open location.
Avoid placing the telephone base too close to:

• Communication devices such as: television sets, VCRs, or other cordless telephones.

• Excessive heat sources.

• Noise sources such as a window with traffic outside, motors, microwave ovens, refrigerators, or fluorescent lighting.

• Excessive dust sources such as a workshop or garage.

• Excessive moisture.

• Extremely low temperature.

• Mechanical vibration or shock such as on top of the washing machine or work bench.

Telephone base and charger installation

Telephone base installation

1. Plug the small end of the larger power adapter into the power jack at the bottom of the telephone base.

2. Plug one end of the telephone line cord into the telephone jack at the bottom of the telephone base.

3. Route cords through slots.

5. Plug the large end of the larger power adapter into an power outlet not controlled by a wall switch.

Telephone line cord

4. Plug the other end of the telephone line cord into a telephone jack.

Power adapter

DSL filter (not included)

Charger installation

1. Plug the small end of the smaller power adapter into the jack on the underside of the charger, then route the cord through the slot as shown.

2. Plug the large end of the smaller power adapter into an electrical outlet.

IMPORTANT INFORMATION

1. Use only the power adapter supplied with this product. To order a replacement power adapter, visit our website at **www.telephones.att.com** or call **1 (800) 222-3111.** In Canada dial **1 (866) 288-4268.**

2. This power adapter is intended to be correctly oriented in a vertical or floor mount position.

3. If you receive high speed internet through your telephone line (commonly referred to as DSL), and you are experiencing interference during telephone conversations and/or your caller ID features are not functioning properly, install a DSL filter to the telephone line between the telephone base and the telephone wall jack. Contact your DSL provider for a DSL filter.

Quick reference guide

Handset

⬍ DIR / ⬍ CID
