Quick start guide

**TL76108**

5.8 GHz 2-line corded/cordless telephone/answering system with caller ID/call waiting
Installation preparation

You must install and charge the battery before using the telephone.

STOP!

If you subscribe to high-speed Internet service (Digital Subscriber Line - DSL) through your telephone lines, you must install a DSL filter between the telephone base and the telephone wall jack (pages 2-4). The filter will prevent noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

Your product may be shipped with a protective sticker covering the handset or telephone base display - remove it before use.

For customer service or product information, visit our website at www.telephones.att.com or call 1 (800) 222-3111. In Canada, dial 1 (866) 288-4268.

Avoid placing the telephone base too close to:

- Communication devices such as: television sets, VCRs, or other cordless telephones.
- Excessive heat sources.
- Noise sources such as a window with traffic outside, motors, microwave ovens, refrigerators, or fluorescent lighting.
- Excessive dust sources such as a workshop or garage.
- Excessive moisture.
- Extremely low temperature.
- Mechanical vibration or shock such as on top of the washing machine or work bench.
Telephone base installation (2-line jack)

If you subscribe to high-speed Internet service (Digital Subscriber Line - DSL) through your telephone lines, you must install a DSL filter between the telephone base and the telephone wall jack. The filter will prevent noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

The telephone line cord can be plugged into **LINE 1/L1+L2** or **LINE 2** telephone jack in the telephone base. However, it is suggested to plug the telephone line cord with two telephone numbers into the **LINE 1/L1+L2** telephone jack if you intend to connect the telephone to a fax machine or modem through the **DATA** port.

If you have a **2-line wall jack**, install the telephone base as shown below.

**Telephone base installation**

1. Plug the small end of the telephone base power adapter into the power jack at the bottom of the telephone base.
2. Plug the telephone base power adapter into an electrical outlet not controlled by a wall switch.
3. Plug one end of the telephone line cord into the **LINE 1/L1+L2** telephone jack at the bottom of the telephone base.
4. Plug the other end of the telephone line cord into a 2 line telephone jack.
5. Plug the other end of the coiled handset cord into the jack at the bottom of the telephone base and route the cord through the slots.

**IMPORTANT INFORMATION**

1. Use only the power adapters supplied with this product or equivalent. To order a replacement power adapter, visit our website at **www.telephones.att.com**, or call **1 (800) 222-3111**. In Canada, dial **1 (866) 288-4268**.

2. These power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
Telephone base installation (1-line jack)

If you subscribe to high-speed Internet service (Digital Subscriber Line - DSL) through your telephone lines, you must install a DSL filter between the telephone base and the telephone wall jack. The filter will prevent noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

The telephone line cord can be plugged into either LINE 1/L1+L2 or LINE 2 telephone jack. However, you have to plug the telephone line cord into LINE 2 jack if you need to connect to a fax machine or modem through DATA port. All data will only be transmitted through LINE 2 jack.

If you have 1-line wall jack, install the telephone base as shown below.

**Telephone base installation**

1. Plug the small end of the telephone base power adapter into the power jack at the bottom of the telephone base.

2. Plug the telephone base power adapter into an electrical outlet not controlled by a wall switch.

3. Plug one end of the telephone line cord into the LINE 1/L1+L2 or LINE 2 telephone jack at the bottom of the telephone base.

4. Plug the other end of the telephone line cord into a telephone jack.

5. Plug the other end of the coiled handset cord into the jack at the bottom of the telephone base and route the cord through the slots.

**IMPORTANT INFORMATION**

1. Use only the power adapters supplied with this product or equivalent. To order a replacement power adapter, visit our website at www.telephones.att.com, or call 1 (800) 222-3111. In Canada, dial 1 (866) 288-4268.

2. These power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
Telephone base installation (separate line jack)

If you subscribe to high-speed Internet service (Digital Subscriber Line - DSL) through your telephone lines, you must install a DSL filter between the telephone base and the telephone wall jack. The filter will prevent noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

Each of the telephone line cord can be plugged into **LINE 1/L1+L2** or **LINE 2** telephone jack. Telephone line cord plugged into **LINE 2** jack will be used for data transmission.

If you have **separate wall jacks** for each line, install the telephone base as shown below.

**Telephone base installation**

1. Plug the small end of the telephone base power adapter into the power jack at the bottom of the telephone base.

2. Plug the telephone base power adapter into an electrical outlet not controlled by a wall switch.

3. Plug one end of the telephone line cord into the **LINE 1/L1+L2** telephone jack and plug one end of the other telephone line cord into the **LINE 2** telephone jack at the bottom of the telephone base.

4. Plug the other end of the telephone line cords into the line 1 and line 2 telephone jacks respectively.

5. Plug the other end of the coiled handset cord into the jack at the bottom of the telephone base and route the cord through the slots.

**IMPORTANT INFORMATION**

1. Use only the power adapters supplied with this product or equivalent. To order a replacement power adapter, visit our website at [www.telephones.att.com](http://www.telephones.att.com) or call 1 (800) 222-3111. In Canada, dial 1 (866) 288-4268.

Handset battery installation & charging

Install the battery as shown below. After installing the battery, you can make and receive short calls, but replace the handset in the charger when the handset is not being used. For optimal performance, charge the handset battery for at least 16 hours before use. When fully charged, the handset battery provides up to approximately eight hours of talk time or four days of standby time.

Step ①
Press the tab and slide the battery compartment cover downwards.

Step ②
Insert the supplied battery as indicated. Insert the top (on contacts and tab) in first, then push downwards on the lower portion of the battery.

Step ③
Align the cover flat against the battery compartment, then slide it upwards until it clicks into place.

Step ④
Charge the handset by placing it facing the front in the charger. The CHARGE light will be on when the handset is charging.

IMPORTANT INFORMATION
