Quick Start Guide

2.4 GHz Cordless Telephone/Answering System E2728B/E1128B

with Caller ID & Call Waiting
**Installation and setup**

After battery installation, place the cordless handset in the base or charger and allow to charge for at least 16 hours before use. You can keep the battery charged by returning the cordless handset to the base or charger after each use. When the battery is fully depleted, a recharge takes about 16 hours. The talk time on a fully charged battery is about four hours depending on environmental conditions, and the standby time is approximately five days. Actual battery life will depend on usage conditions, and age of battery.

- **Low battery indicator.** Return cordless handset to base or charger to recharge when this symbol flashes. (When in use the cordless handset will beep when battery is low).

- **Caution:** Use only the supplied rechargeable battery or AT&T replacement battery model 3301 (SKU 91076, Part Number 80-5071-00-00).

- Press down on tab to open the battery door.

- Slide the battery door up to close.

- Place handset in base or charger to charge for at least 16 hours before first use.

- **Plug the large power adapter into an electrical outlet not controlled by a wall switch.**

- **Plug the telephone line cord into telephone jack.**

- **Plug the battery pack connector securely into the plug inside the cordless handset battery compartment, matching the color-coded label. Then place battery pack into compartment.**

- **BATTERY LOW**

- **SETUP** - Press to review or change an outgoing announcement.
- **CHANGE** - Press again to review or change answering system options.
- **REC/MEMO** - Press to record a memo.

**NOTE:** For more information, please refer to the user’s manual.
Choose a location for your telephone

Choose a central location close to a telephone jack and a power outlet not connected to a wall switch. The telephone base can be placed on a flat surface or mounted on a standard wall plate. For optimum range and better reception, place the telephone base in a high and open location.

Avoid placing the telephone base too close to:

- Communication devices such as: personal computers, computer routers, television sets, VCRs, wireless routers (wireless broadband, wi-fi, or 802.11), other cordless telephones, etc.
- Excessive heat sources such as radiators, ventilation ducts, and direct sunlight.
- Noise sources such as a window with traffic outside, motors, microwave ovens, refrigerators, and fluorescent lighting.
- Excessive dust sources such as: a workshop, garage, etc.
- Excessive moisture such as the bathroom, kitchen, sauna, or greenhouse.
- Extremely low temperatures such as the garage.
- Mechanical vibration or shock such as on top of the washing machine or on a work bench.
