### Caller ID

This product supports caller ID services offered by most telephone service providers. The telephone stores caller ID information for the last 50 incoming calls in the telephone base. This information is common to all handsets.

#### Missed call indicator

When a handset is in idle mode and has new or missed calls, its screen shows XX Missed calls.

You can erase the missed call indicator either by reviewing the call log one by one, or by pressing and holding \( \text{CANCEL} \) on the handset in idle mode.

#### Review and dial a number in the call log

1. \( \text{CID} \) in idle mode -> \( \text{V} \) or \( \text{A} \) to scroll through the list.
2. \( \text{PHONE} \) or \( \text{4/SPEAKER} \) to call when the desired entry is displayed.

#### Caller ID announce

When this feature is on and you have an incoming call, the handset and/or base speaks "Call from..." and the name of the caller based on the directory or caller ID information. You can turn this feature on or off for the base or each individual handset, or both.

1. \( \text{MENU} \) -> \( \text{V} \) or \( \text{A} \) -> Settings -> \( \text{SELECT} \).
