Quick start guide

Battery
Install the battery, as shown below. Charge your handset(s) before initial use. The battery is fully charged after ten hours of continuous charging.

Handset
1. Press to make or answer a call using the speakerphone.
2. During a call, press to mute the microphone.
3. Press to delete digit or character.
4. Flash when new messages are waiting.
5. When the handset is not in use, press to show the menu.
6. During a call, press to hang up.

Telephone base
1. Install the battery, as shown below. Charge your handset(s) when the telephone is in use or when the answering system is answering an incoming call.
2. Shows when the telephone is ringing.
3. Shows the number of messages in your voice mailbox.
4. During a call, press to block the call.
5. To set or dial your area code.
6. Press to scroll up or down in menus.
7. Press to show caller ID log messages, as instructed.

Part lists
1 for CL82107
2 for CL82207
3 for CL82307
4 for CL82407
5 for CL82507

Date and time
1. ➤ Menu ➤ 3 ➤ 1 ➤ 1 ➤ Set date/time ➤ select.
2. ➤ to enter the month, day, and year using the dialing keys ➤ SELECT.
3. ➤ to turn the handset or the telephone on using the dialing keys ➤ SELECT.
4. ➤ or ➤ to choose AM or PM ➤ select.

Basic answering system setup via voice guide
You can follow the voice guide to record your own announcement, set the number of rings and set the message alert tone.

Basic initial settings
We recommend you program your telephone system before use. The following are a few examples of common features to set before using the telephone. Refer to the Handset settings and Answering system settings in the Abridged user’s manual or the online Complete user’s manual for detailed instructions on setting all telephone features.

Record your own announcement
Your outgoing answering plays when calls are answered by the answering system. You can use the preset announcement to answer calls, or replace it with your own recorded announcement.

Number of rings
You can set the answering system to answer an incoming call after 2, 3, 4, 5, or 6 rings. You can also select toll saver. If you choose toll-saver, the answering system answers a call after two rings when you have new messages, and after four rings when there are no new messages. This enables you to check for new messages and avoid paying unnecessary long distance charges if you are calling from out of your local area.

If you want the built-in answering system instead of the voicemail to answer a call, you should set the answering system to answer the call at least two rings before the voicemail is set to answer. Contact your telephone service provider for information on your voicemail settings.

Ringer volume
You can set the ringer volume level to one of the six levels, or turn the ringer off.

Press and hold to set or dial your area code.
Press to switch to tone dialing temporarily during a call if you have pulse service.
While entering names, press to change the next letter to upper or lower case.
Press and hold to enter the QUIET mode on the display screen, or to deactivate QUIET mode.

This quick start guide provides you with basic instructions only. For more complete instructions, refer to your Abridged user’s manual provided in the package, or see the online Complete user’s manual at www.telephones.att.com/manuals.
Call categories
- Numbers found in block list.
