### Basic initial settings

**We recommend you program your telephone system before use.** The following are a few examples of common features to set before using the telephone. Refer to the **Handset settings, Telephone base settings and Answering system settings** in the Abridged user's manual or the online Complete user's manual for detailed instructions on setting all telephone features.

### Date and time

Note: Set the date/time before using the answering system.

**Using a cordless handset or the telephone base:**

1. **MENU** -> **▼ CID** or **▲ DIR** -> **Set date/time** -> **SELECT**.
2. Enter the month, day and year using the dialing keys -> **SELECT**.
3. Enter the hour and minute using the dialing keys.
4. **▼ CID** or **▲ DIR** to choose **AM** or **PM** -> **SELECT**.

### Basic answering system setup via voice guide

You can follow the voice guide to record your own announcement, set the number of rings and set the message alert tone.

**Using the telephone base:**

1. **MENU** -> **▼ CID** or **▲ DIR** -> **Answering sys** -> **SELECT**.
2. **▼ CID** or **▲ DIR** -> **Voice guide** -> **SELECT**.
3. Set up the answering system by inputting the designated numbers, as instructed.

Record your own announcement

Your outgoing announcement plays when calls are answered by the answering system. You can use the preset announcement to answer calls, or replace it with your own recorded announcement.

- Using a cordless handset or the telephone base:**

If you choose toll saver, the answering system answers a call after two rings when you have new messages, and after four rings when there are no new messages. This enables you to check for new messages and avoid paying unnecessary long distance charges if you are calling from out of your local area.

If you want the built-in answering system instead of the voicemail to answer a call, you should set the answering system to answer a call at least two rings before the voicemail is set to answer. Contact your telephone service provider for information on your voicemail settings.

- Using a cordless handset or the telephone base:**
- 1. **MENU** -> ▼ **CID** or ▲ **DIR** -> **Answering sys** -> **SELECT**.
  - 2. ▼ **CID** or ▲ **DIR** -> **Ans sys setup** -> **SELECT**.
