Introducing Smart call blocker

Smart call blocker is an effective call screening tool, which allows your phone system to screen ALL calls. Smart call blocker filters robocalls and unwanted calls for you, while allowing welcome calls to get through.

You can set up your lists of welcome callers and unwanted callers. The Smart call blocker allows calls from your welcome callers to get through, and blocks calls from your unwanted callers. For other unknown calls, you can allow, block, or screen these calls, or forward these calls to the answering system.

With some easy configurations, you can set to only filter robocalls by asking the callers to press the pound key (\#) before the calls are put through to you. You can also set the Smart call blocker to screen calls by asking the callers to record their names and press the pound key (\#). After your caller completes the request, your telephone rings and announces the caller’s name. You can then choose to block or answer the call, or you can forward the call to the answering system. If the caller hangs up, or does not respond or record his/her name, the call is blocked from ringing through. When you add your welcome callers to your Directory or Allow list, they will bypass all screening and ring directly to your handsets.

Setup

### Directory
Enter and save telephone numbers of frequently called businesses, family members and friends, so that when they call, your telephone rings without having to go through the screening process.

Add contacts in your directory:
1. Press MENU on the handset or telephone base.
2. Press \* or # to choose Directory and then press SELECT.
3. Enter a name (up to 15 characters), and then press SELECT.
4. Enter a telephone number (up to 30 digits), and then press SELECT.
5. Enter a name (up to 15 characters), and then press SELECT.
6. To add another contact, repeat from step 3.

### Block list
Add numbers that you want to prevent their calls from ringing through.

Add a block entry:
1. Press CALL BLOCK on the handset or telephone base.
2. Press \* or \# to choose Block list, and then press SELECT.
3. Press \* or \# to choose Block list, and then press SELECT.
4. Enter a telephone number (up to 30 digits), and then press SELECT.
5. Add a call entry in block list, repeat from step 3.

### Allow list
Add numbers that you want to always allow their calls to get through to you without having to go through the screening process.

Add an allow entry:
1. Press CALL BLOCK on the handset or telephone base.
2. Press \* or \# to choose Allow list, and then press SELECT.
3. Press \* or \# to choose Allow list, and then press SELECT.
4. Enter a telephone number (up to 30 digits), and then press SELECT.
5. Add a number entry in allow list, repeat from step 3.

### Star name list
Add caller NAMES to your star name list to allow their calls to get through to you without having to go through the screening process.

Add a star name entry:
1. Press CALL BLOCK on the handset or telephone base.
2. Press \* or \# to choose Star list, and then press SELECT.
3. Press \* or \# to choose Star list, and then press SELECT.
4. Enter a name (up to 15 characters), and then press SELECT.
5. Add a number entry in star list, repeat from step 3.

You are now ready to start using your telephone system with Smart call blocker.

To turn on call screening:
1. Press CALL BLOCK on the handset.
2. Press \* or \# to choose Set profile, and then press SELECT.
3. Press SELECT again to choose Screen unknown.

Selecting the Screen unknown profile option will set your telephone to screen all unknown calls and ask for the caller’s name before putting the calls through to you.

---

**Not familiar with Smart call blocker?**

Smart call blocker is an effective call screening tool, which allows your phone system to screen ALL calls. If you are not familiar with it or want to know more before you start, read on and learn how to change to call screening mode, and perform the necessary preparations before use.

**Use of Smart call blocker feature requires subscription of caller ID service.**

So... what is Smart call blocker?

Smart call blocker filters robocalls and unwanted calls for you, while allowing welcome calls to get through.

You can set up your lists of welcome callers and unwanted callers. The Smart call blocker allows calls from your welcome callers to get through, and blocks calls from your unwanted callers. For other unknown calls, you can allow, block, or screen these calls, or forward these calls to the answering system.

With some easy configurations, you can set to only filter robocalls by asking the callers to press the pound key (\#) before the calls are put through to you. You can also set the Smart call blocker to screen calls by asking the callers to record their names and press the pound key (\#). After your caller completes the request, your telephone rings and announces the caller’s name. You can then choose to block or answer the call, or you can forward the call to the answering system. If the caller hangs up, or does not respond or record his/her name, the call is blocked from ringing through. When you add your welcome callers to your Directory or Allow list, they will bypass all screening and ring directly to your handsets.
