Handset

Phone base

Basic initial settings

We recommend you program your telephone system before use. Use the keypad or your computer to set basic features, because you can set the phone while using the telephone. Refer to the Product and telephone base settings and Answering system settings in the Abridged user’s manual or the online Complete user’s manual for detailed instructions on setting all telephone features.

Date and time

New: Set the date and time before using the answering system. You can only set the date and time using the dialing keys — SELECT.

Location: To change the time zone and current date, press and hold the dialing key for two seconds.

Auto update: To auto update the clock set bya computer, press and hold the dialing key. You can only update the clock if you have already set the date and time.

Record your own announcement

You may have the answering system answer when a call comes in automatically. You can use the preset announcement to answer calls, or replace it with your own announcement.

Using a cordless handset or the telephone base:

1. Press PM to enter the answering system.
2. Press SEL to select Answering.
3. Press SEL to select Record ann.
4. Use the phone to dial (or hold a menu key) to preset your announcement. Press PM to decline.

Number of rings

You can set your telephone system to answer an incoming call after 2, 3, 4, or 5 rings. You can select toll saver if you want the answering system to answer a call when you have new messages, and after four rings when you do not have any new messages. This enables you to check for new messages and avoid paying any unnecessary long distance bills.

If you want the answering system instead of the voicemail to answer a call, you should set the answering system as your primary option, as well as set the answering system to alert you with a ring tone.

If you want to turn off the answering system instead of the voicemail to answer a call, you should set the answering system to alert you with a ring tone.

Use the keypad to set the answering system according to your need.

Number of rings:

1. Press PM to enter the answering system.
2. Press SEL to select Answering.
3. Press SEL to select Ringing.
4. Press SEL to select Number of rings.
5. Use the keypad to set the number of rings.

Ringer volume

You can set the ringer volume to one of three levels, or turn off the ringer if you are using a cordless handset or the telephone base.

Using a cordless handset or the telephone base:

1. Press PM to enter the answering system.
2. Press SEL to select Ringer volume.
3. Press SEL to select the level of ringer volume.
**Caller ID announce**

When the feature is on and you answer an incoming call, the telephone displays the current caller’s name and number (if available from your service provider). You can then choose to accept or reject the call. If you choose to reject it, the telephone blocks the call by storing the caller’s name and number in the block list for future reference.

**Using cordless handset or the telephone base:**

1. During call, press **CALL BLOCK**.
2. Press **SELECT** to accept or reject the call.
