Introducing Smart call blocker

DECT 6.0 cordless telephone/answering system with caller ID/call waiting

Not familiar with Smart call blocker?
Want to know more?

Smart call blocker is an effective screening tool, which allows your phone system to screen ALL home calls.

- The screening feature of Smart call blocker is applicable to home calls only. All incoming cell calls will go through and ring if you want to block cell call, add the number to the block list. Read an ad learn how to add number in the block list.

Smart call blocker is an effective call screening tool, which allows your phone system to screen ALL home calls.

- If you want to block a cell call, add the number to the block list. Read on and learn how to add number in the block list.

So... what is Smart call blocker?

Smart call blocker filters robocalls and unwanted calls for you, while allowing welcome calls to get through.

You can set up your lists of welcome callers and unwelcome callers. The Smart call blocker allows calls from your welcome callers to get through, and it blocks calls from your unwelcome callers.

- For other unknown home calls, you can allow, block, or screen these calls, or forward these calls to the answering system.

With some easy configurations, you can set to only filter robocalls on the home line by asking the callers to press the pound key (#) before the calls are put through to you.

You can also set the Smart call blocker to screen home calls by asking the caller to record their names and press the pound key (#). After your caller completes the request, your telephone rings and announces the caller's name. You can then choose to block or answer the call, or you can forward the call to the answering system. If the caller hangs up, or does not respond or record his/her name, the call is blocked from ringing through. When you welcome your welcome callers to your Directory or Allow list, they will bypass all screening and ring directly to your handsets.

Call screening

To turn on call screening:
1. Press MENU on the handset.
2. Press to choose Smart call blk, and then press SELECT.
3. Press to choose Allow list, and then press SELECT.

5. Enter a name (up to 15 characters), and then press SELECT.

To add another entry in star name list, repeat from step 4.
Choose the Smart call block configuration that best suits your needs.

Use voice guide to set Smart call blocker

Right after installing your phone, the voice guide will provide you a quick and easy way to configure Smart call blocker.

After you install your telephone, the handset will prompt you to set the date and time. After the date and time setting is done or skipped the handset then prompts if you want to set Smart call blocker - "Hello! This voice guide will assist you with the basic setup of Smart call blocker." Scenarios (1) and (2) are very easy to set up with the voice guide. Just press 1 or 2 on the handset when prompted.

Press 1 if you want to set screen home calls with telephone numbers that are not saved in your Directory, Allow list, or Star name list; or Press 2 if you do not want to set screen calls, and you want to allow all incoming calls to get through.

Note: To restart the voice guide:
1. Press MENU on the handset.
2. Press *CD or *DR to choose Smart call blk, and then press SELECT.
3. Press *CD or *DR to choose Voice guide, and then press SELECT.

Quick setup using the Set profile option

You can perform the following steps to quickly set up Smart call blocker, as described in the five scenarios on the right:

1. Press MENU on the handset.
2. Press *CD or *DR to choose Smart call blk, and then press SELECT.
3. Press *CD or *DR to choose Set profile, and then press SELECT.
4. Press *CD or *DR to select from the following five options, and then press SELECT to confirm:
   - Screen unknown
   - Screen robot
   - Allow unknown
   - UnknownToAns.S
   - Block unknown

Screen and block robocalls (3)
