User’s manual

SynJ SB67158
DECT 6.0 4-line corded/cordless
small business system
Congratulations on your purchase of this AT&T product. Before using this AT&T product, please read the Important safety information on pages 90-91 of this manual. Please thoroughly read this user’s manual for all the feature operations and troubleshooting information necessary to install and operate your new AT&T product. You can also visit our website at www.telephones.att.com or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268.

Model number: SynJ® SB67158
Type: DECT 6.0 4-line corded/cordless small business system
Serial number: ________________________________
Purchase date: ________________________________
Place of purchase: ________________________________

Both the model and serial numbers of your AT&T product can be found on the bottom of the telephone base.

Save your sales receipt and original packaging in case it is necessary to return your telephone for warranty service.

Telephones identified with this logo have reduced noise and interference when used with most T-coil equipped hearing aids and cochlear implants. The TIA-1083 Compliant Logo is a trademark of the Telecommunications Industry Association. Used under license.
Parts checklist

Check to make sure the telephone package includes the following items:

- Telephone base
- Handset with coiled cord installed
- Two telephone line cords (4-conductor)
- Telephone base power adapter
- 2 Line splitters
- Audio cable

Quick reference guide

LINE 1-LINE 4 keys
Press to make or answer a call on the desired line (pages 44-46).

NEW CALL indicator
On when there are new or missed calls (page 68).

MENU/ENTER
Press to enter the menu. While in the menu, press to select an item or save an entry or setting.

NEW CALL indicator
When in idle mode, press to enter the general mailbox menu (page 78).

CONF
Press to add another extension or outside line to an existing call (pages 51-52).

HOLD
Press to place an outside call on hold (page 50).

Navigation keys
While in menus, press ▲ or ▼ to scroll through the menus, highlight items or change settings. Press ◀REP to return to the previous menu.

While entering names or numbers, press ◀REP or ◀SKIP to move the cursor to the left or right.

While playing back messages, press ◀REP once to repeat the message, or press ◀REP twice to hear the previous message, or press ◀SKIP to skip to the next message.

ANSWER ON keys
Press to show the automatic answer options for that line (page 74).

EXIT
While in a menu, press to cancel an operation and exit the menu display.
Getting started

Quick reference guide

CALL LOG
Press to view caller ID information (page 68).

PAUSE/REDIAL
Press repeatedly to view the last 10 numbers dialed (page 46).
While entering digits, press to insert a dialing pause (page 62).

INT/PTT ALL
Press to page all extensions. An intercom connection is established with the first extension that answers (page 54).
Press and hold to broadcast your voice to all extensions (page 58).

One-touch keys, EXT 1-0
Press to intercom with the desired cordless extension number (page 54).
Press and hold to broadcast your voice to that extension (page 58).

Directory card
To write names on the directory card, follow the steps mentioned below:

1. Remove the clear plastic cover by inserting the tip of a small item, such as a paper clip, into the hole at the top edge of the cover.
2. Pull out the directory card.
3. Write the information on the directory card.
4. Replace the directory card and the plastic cover.
Quick reference guide

HEADSET
When a corded headset is connected to the telephone base, press to get a line, answer a call or hang up (pages 41-42). The red indicator is on when the headset is in use.

INT
When in idle mode, press to initiate an intercom call (page 54).

MUTE
During a call, press to mute the microphone (page 50). During an incoming call, press to mute the ringer (page 46).

DND (do not disturb)
Press twice to turn the feature on. Press again to turn it off (page 17).

SPEAKER
Press to turn on the speakerphone. Press again to turn it off (page 45).

FLASH
During a call, press to answer an incoming call when you receive a call waiting alert (page 47).

XFER (transfer)
Press to transfer a call to an extension (page 56). Press to transfer messages from the general mailbox to a handset mailbox (page 80).

VOL+/VOL-
During a call, press to adjust the listening volume (page 16). During message playback, press to adjust the playback volume (page 79).

HEADSET
When a corded headset is connected to the telephone base, press to get a line, answer a call or hang up (pages 41-42). The red indicator is on when the headset is in use.

INT
When in idle mode, press to initiate an intercom call (page 54).

FLASH
During a call, press to answer an incoming call when you receive a call waiting alert (page 47).

XFER (transfer)
Press to transfer a call to an extension (page 56). Press to transfer messages from the general mailbox to a handset mailbox (page 80).

VOL+/VOL-
During a call, press to adjust the listening volume (page 16). During message playback, press to adjust the playback volume (page 79).

Main menu
The > symbol highlights a menu item.

Main menu
- Directory (pages 60-65)
- Call log (pages 62-70)
- Ringer setting (pages 15-17)
- RestrictedPrefix (page 18)
- Mailbox setup (pages 32-37)
- Base setup (pages 19-27)
- COVM (page 53)
- Speed dial setup (page 41)
- Customer support (page 41)
- Registration (pages 10-13)

Using menus
- Press MENU/ENTER to show the first menu item, Directory.
- Press ▲ or ▼ to scroll through menu items.
- Press MENU/ENTER to select or save changes to a highlighted menu item.
- Press EXIT to cancel an operation, exit the menu display or return to the idle screen.
- Press REP to back up to the previous menu.
Installation

Install the telephone base close to a telephone jack and a power outlet not controlled by a wall switch. The telephone base should be placed on a flat surface. For optimum range and better reception, place the telephone base in a central and open location.

If you subscribe to high-speed Internet service (DSL - digital subscriber line) through your telephone lines, you must install a DSL filter between each telephone line cord and telephone wall jack (page 7). The filter prevents noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

Your product may be shipped with a protective sticker covering the telephone base and handset displays - remove them before use.

For customer service or product information, visit our website at www.telephones.att.com or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268.

Avoid placing the telephone base too close to:

- Communication devices such as television sets, VCRs, or other cordless telephones.
- Excessive heat sources.
- Noise sources such as a window with traffic outside, motors, microwave ovens, refrigerators, or fluorescent lighting.
- Excessive dust sources such as a workshop or garage.
- Excessive moisture.
- Extremely low temperature.
- Mechanical vibration or shock such as on top of a washing machine or work bench.
Planning your system

The SynJ SB67158 system supports a maximum of four external lines, which are provided by your telephone service provider.

You can expand the system by adding a combination of up to 10 additional cordless handsets (AT&T model SynJ SB67108), desksets (AT&T model SynJ SB67148), and one cordless headset (AT&T model TL7600). The system automatically assigns an extension number to each device you add.

You can use a DECT 6.0 repeater (AT&T model SynJ SB67128) to extend the operating range for cordless handsets to cover areas where the signal is very weak or not available.

NOTES:

- If you have two or three telephone lines, you will need one two-line adapter for every two lines. If you have four telephone lines, you will need two two-line adapters.
- If your establishment has four telephone lines from one-line telephone jacks, you will need to purchase a telephone line cord (purchased at an electronics store in your area) or equivalent for each two-line adapter.
- If you have high-speed Internet service (DSL - digital subscriber line), you need to have an external or internal DSL splitter for each telephone line installed at your location by your DSL provider.

IMPORTANT INFORMATION

For complete instructions on using accessory cordless handsets or headsets, please refer to the appropriate manual.

Purchase any desired accessories:

- Cordless handsets (AT&T model SynJ SB67108)
- DECT 6.0 expansion desksets (AT&T model SynJ SB67148)
- Cordless headsets (AT&T model TL7600)
- DECT 6.0 repeaters (AT&T model SynJ SB67128)
- Additional telephone line cords

To order these accessories or to view the manuals, visit our website at www.telephones.att.com, or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268.
Telephone base installation

To connect the corded handset and power adapter to the telephone base

Plug the large end of the power adapter into a power outlet not controlled by a wall switch.

Raise the two antennas for optimum wireless range and performance. For greater range, add optional repeaters (AT&T model SynJ SB67128).

Plug the small end of the power adapter into the power jack at the bottom of the telephone base. Route the power adapter cord through the slot on the bottom of the telephone.

NOTE: For complete instructions on installing the cordless handset, see Add and register handsets on page 10 of this user’s manual, or refer to the SynJ SB67108 user’s manual. For complete instructions on installing the expansion deskset, see Add and register desksets on page 11 of this user’s manual, or refer to the SynJ SB67148 user’s manual. You can visit www.telephones.att.com/smb to download the user’s manuals.

IMPORTANT INFORMATION
1. Use only the power adapter supplied with this product. To order a replacement power adapter, visit our website at www.telephones.att.com, or call 1 (888) 915-2007.

In Canada, dial 1 (866) 288-4268.

2. The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.
Getting started

Telephone base installation

To connect the telephone line cords to the telephone base

If you subscribe to high-speed Internet service (DSL - digital subscriber line) through your telephone lines, you must install a DSL filter between each telephone line cord and telephone wall jack. The filter prevents noise and caller ID problems caused by DSL interference. Please contact your DSL service provider for more information about DSL filters.

Install the telephone line cords, as shown below:

Option 1: To connect two 2-line wall jacks
Option 2: To connect four one-line wall jacks

**NOTES:**

1. If you have three one-line wall jacks, you need a two-line adapter for two of the lines.
2. The long cords supplied with the telephone are four-conductor cords.
Optional backup battery installation

In the event of a power failure, if four AA batteries (purchased separately) are installed in the telephone, your telephone base can still operate. All lines will work.

If power fails during a call on the telephone base, the call continues until you hang up. If power fails during a call on a handset, you can still make and answer calls. During a power failure, although the screen backlight is off, you can still make and answer calls. If the power resumes while you are on a call, the call continues.

Install the batteries, as shown below:

Step 1 Open the backup battery compartment cover.

Step 2 Place the batteries in the compartment following the polarity label +/−.

Step 3 Align the cover flat against the battery compartment, then slide it to the left until it clicks into place to lock the cover.

NOTES:

1. Use disposable AA alkaline batteries only. Do not use rechargeable batteries.
2. When the backup battery is in low battery mode, the screen displays Low battery.
Getting started

Expand your telephone system

Your telephone can support a maximum of 10 handsets/desksets, or 9 handsets/desksets and one cordless headset. You can add handsets, desksets, and one headset (AT&T models SynJ SB67108, SynJ SB67148 and TL7600, sold separately) to the SynJ SB67158 at any time, but each new handset/deskset or headset must be registered to the telephone base before use. You must register each handset, deskset and headset separately.

Additional handsets are assigned numbers in the order they are registered (Handset 1 to Handset 10).

If the handset does not have enough power to proceed with the registration, you need to charge the new handset for at least five minutes (see Battery installation and charging in the SynJ SB67108 cordless handset manual). Start registration when the handset screen shows Press MENU on BS, sel Registration & sel Register HS. Then put HS in cradle.

To register a cordless handset to your telephone base

1. Make sure the handset is out of the charger and the screen shows Press MENU on BS, sel Registration & sel Register HS. Then put HS in cradle. before you begin registration.

2. On the telephone base, press MENU/ENTER.

3. Scroll down to Registration and press MENU/ENTER.

4. Press MENU/ENTER again to select Register HS. The telephone base screen shows Registering new device...

5. Place the unregistered handset into the charger. The handset beeps once and begins registering to the telephone base. It takes up to 60 seconds to complete the registration. There is a beep sound when the registration is successful. The telephone base shows Handset registered and then the handset shows X:Handset X (X represents the handset number [1-0]; Handset X represents the handset name).

NOTES:

1. If the registration is not successful, the telephone base screen displays Registration failed with an error tone. To reset the handset, remove the handset from the cradle. Try the registration process again.

2. Make sure to remove all unregistered system handsets or cordless headset from the cradles before registering a new handset.
Getting started

Add and register desksets

Additional desksets are assigned numbers in the order they are registered (Deskset 1 to Deskset 10).

Start registration when the deskset screen shows **Press MENU on MAIN base, select Registration & then Register HS. Then press Start.**

To register a deskset to your telephone base

1. The SynJ SB67148 deskset shows **Press MENU on Main base, select Registration & then Register HS. Then press Start.** before you begin registration.

2. On the main telephone base, press **MENU/ENTER.**

3. Scroll down to **Registration** and press **MENU/ENTER.**

4. Press **MENU/ENTER** again to select **Register HS.**

5. Press the **Start** softkey on the unregistered deskset. The telephone base screen shows **Registering new device...** It takes up to 60 seconds to complete the registration. You hear a beep when the registration is successful. The telephone base shows **Deskset registered** and the deskset shows **X:Deskset X** (**X** represents the extension number [1-0]; **Deskset X** represents the deskset name).

**NOTE:** If the registration is not successful, the telephone base screen displays **Registration failed** with an error tone. Try the registration process again.
Getting started

Add and register a cordless headset

You can use this phone handsfree when you register a DECT 6.0 cordless headset (AT&T model TL7600, sold separately) to the telephone base. You can only register one cordless headset to the telephone base. The cordless headset must have a charged battery. Make sure the headset battery is properly installed.

Place the headset in the headset charger and note the color of the ON/OFF button. If the button flashes a blue and orange light twice every five seconds, the headset is unregistered. If the button shows a constant blue light, the headset is registered. You need to deregister the headset before you can register it to the SynJ SB67158. See the deregistration instructions in the user’s manual of the telephone to which it is currently registered. See page 85 for instructions on using the cordless headset with this telephone.

To register a cordless headset to your telephone base

1. Place the headset in the headset charger and allow it to charge for at least five minutes before beginning registration. Make sure the headset is out of the headset charger before you begin registration.

2. On the telephone base, press MENU/ENTER.

3. Scroll down to Registration and press MENU/ENTER.

4. Press MENU/ENTER again to select Register HS. The telephone base shows Registering new device... It takes up to 60 seconds to complete the registration.

5. Place the headset into the cradle. The telephone base shows Cordless headset registered and beeps when the registration is successful.

6. Lift the headset, then press the headset ON/OFF button. If you hear a dial tone and the extension 0 icon appears on the telephone base, the registration was successful.

If there is no dial tone, or the ON/OFF light on the headset flashes twice every five seconds, the registration was not successful. Remove the headset from the headset charger and repeat the registration process again, starting with Step 2, as mentioned above.

If you have a dial tone but an extension number other than 0 displays on the telephone base, the headset is registered as a handset and will not function properly. If this is the case, you must deregister and start over. See Deregister devices on the next page.
Getting started

Deregister devices

If you already have 10 registered devices and need to replace or add a new device, or if you wish to change the assigned extension numbers of your devices, you must first deregister the desired device(s) first, then register the device(s) you wish to use, one at a time. Deregistering a cordless handset or deskset does not remove the data saved on that device. Please read all the instructions on this page before beginning the deregistration process.

Please make sure the telephone system is not in use before deregistration. To deregister a single device or all devices registered to the telephone base:

1. On the telephone base, press **MENU/ENTER**.

2. Scroll down to **Registration** and press **MENU/ENTER**.

3. Scroll down to **Deregistration** and press **MENU/ENTER**.

4. The telephone base screen shows **Deregister**:.
   - If you want to deregister a single device, scroll to choose the desired device, then press **MENU/ENTER**.
   - If you want to deregister all devices, scroll to choose **All**, then press **MENU/ENTER**.

5. For deregistration of a single device, the telephone base screen prompts if you want to deregister that device. If you selected all devices, it shows **Deregister All? <=No >=Yes**. Press **REP** to exit or press **SKIP** to continue the deregistration.

6. If you press **SKIP**, the telephone base shows **Deregistering**. It takes up to 10 seconds to complete the deregistration. When the deregistration is successful, there is a confirmation tone and the telephone base shows the deregistration completion message.

**NOTES:**

1. If the deregistration process is not successful, you might need to reset the system and try again. To reset, you can press **EXIT** on the telephone base. You can also reset the telephone base by unplugging the power from the telephone base and plugging it back in.

2. To register a cordless handset again, refer to the registration information on page 10.

3. To register an expansion deskset again, refer to the registration information on page 11.

4. To register a cordless headset again, refer to the registration information on page 12.
Add a corded headset

You can use this telephone handsfree when you install any industry-standard 2.5mm corded telephone headset (purchased separately). For best results, use an AT&T 2.5mm corded headset. To purchase a headset, visit our website at www.telephones.att.com, or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268. See page 45 for instructions on using the corded headset with this telephone.

To add a corded headset to the telephone base

Plug a 2.5 mm headset into the HEADSET/AUX IN jack on the side of the telephone base.

Side view of the telephone base

NOTE: If you have corded and cordless headsets connected to your telephone base, the HEADSET button only controls the corded headset.
Menu settings

Use this feature to use the menus to change the telephone base settings.

1. Press **MENU/ENTER** when in idle mode (when the telephone is not in use) to enter the main menu.
2. Press ▲ or ▼ to scroll to the feature to be changed. The > symbol indicates the selected menu item.
3. Press **MENU/ENTER** to select the menu item.
4. Press **EXIT** to exit setup without making changes.

**NOTE:** Press **EXIT** to cancel an operation, exit the menu display, or return to idle mode.

Ringer volume

Use this feature to set the ringer volume to one of three levels or turn the ringer off. When the ringer is off, the 📣 icon appears on the telephone base screen.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Ringer setting**. Press **MENU/ENTER**.
3. Press **MENU/ENTER** again to select **Ringer volume**.
4. Press ▲, ▼, VOL+ or VOL- on the telephone base to adjust the ringer volume.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.

**NOTE:** The ringer volume also determines the ringer volume for intercom calls (page 54). If the telephone base ringer volume is set to off, that telephone base is silenced for all incoming calls, including intercom calls.
Getting started

Telephone base setup

Volume control

Use this feature to independently set the listening volume to one of five levels for each of the three listening options (corded handset, speakerphone and corded headset). While using each, press ▲, ▼, VOL+ or VOL- to adjust the listening volume.

While adjusting the volume on the corded handset or the corded headset, you hear a triple beep when you reach the minimum or maximum volume setting.

The SynJ SB67158 telephone base stores the volume setting for each listening option.

Ringer tone

Use this feature to choose one of the seven ringer tones for incoming calls. You can choose different ringer tones for different lines so you can easily identify which line is ringing.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Ringer setting. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Ringer tone. Press MENU/ENTER.
4. Press REP or SKIP to select the desired line (L1, L2, L3 or L4).
5. Press ▲ or ▼ to select a desired ringer tone.
6. Repeat steps 4-5 to choose ringer tones for other lines, if desired.
7. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

NOTE: If you turn off the ringer volume, you will not hear ringer tone samples.
Getting started

Telephone base setup

Ring group

Use this feature to specify which extensions receive incoming calls. By default, all extensions and the telephone base receive incoming calls. You can block some extensions from receiving calls, however, they can still be used to make outgoing calls.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Ringer setting. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Ring group. Press MENU/ENTER.
4. Press REP or SKIP to select a desired line (L1, L2, L3 or L4) while Ring group flashes.
5. Press ▲ or ▼ to scroll to Extension number. Use the dial pad to press the number of the extension (*1,2,3,4,5,6,7,8,9,0) that you want to delete, or press the number again to add it back to the ring group.
6. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

NOTE: The symbol ★ represents the telephone base; 0 represents extension 10.

Do not disturb (DND)

Use this feature to silence your telephone base. When you activate the do not disturb function, the icon appears on the telephone base screen and you will not hear paging tones, voice paging or incoming call rings.

Instead, the LINE 1-LINE 4 indicator flashes to signal an incoming call. If you receive an intercom call, the extension number of that intercom call appears on the screen display.

1. Press DND twice to prevent interruptions. The DND indicator turns on.
2. Press DND again to resume normal call alerts. The DND indicator turns off.
Getting started

Telephone base setup

**Restricted prefix**

This feature allows you to restrict certain extensions from dialing telephone numbers starting with the user-defined prefix (from one to three digits).

If you attempt to dial out with the restricted prefix using an extension in the restricted list, there is an alert sound and **Call restricted** displays on the screen. After about five seconds, the device returns to idle mode.

**Set restricted prefix:**

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **RestrictedPrefix**, then press **MENU/ENTER**.
3. Press **MENU/ENTER** again to select **Set prefix**.
4. Enter the restricted prefix (up to three digits) using the dial pad when prompted.
   - Press ◀REP or ◀SKIP to move the cursor to the left or right.
   - Press REMOVE to backspace and delete a digit.
   - Press and hold REMOVE to erase all digits.
5. Press **MENU/ENTER** to save the setting. The screen displays the restricted prefix briefly and then returns to the previous menu. There is a confirmation tone. To exit, press **EXIT**.

**Set restricted extension:**

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **RestrictedPrefix**, then press **MENU/ENTER**.
3. Press ▲ or ▼ to scroll to **Restricted Ext**, then press **MENU/ENTER**.
4. Use the dial pad to press the number of the extension (*1,2,3,4,5,6,7,8,9,0*) that you want to restrict, or press the number again to remove it from the list.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit, press **EXIT**.
Getting started

Telephone base setup

**LCD contrast**

Use this feature to adjust the screen contrast to one of six levels to optimize readability in different lighting conditions.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Base setup**, press **MENU/ENTER**.
3. Press **MENU/ENTER** again to select **LCD contrast**.
4. Press ▲ or ▼ to adjust the screen contrast level. The screen display temporarily fades away as you press ▼ and reappears as you press ▲.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit, press **EXIT**.

**Key tone**

Use this feature to turn the key tone on and off. The telephone base is factory set to beep with each key press. You can turn off this beep sound by turning the key tone off.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Base setup**. Press **MENU/ENTER**.
3. Press ▲ or ▼ to scroll to **Key tone**. Press **MENU/ENTER**.
4. Press ▲ or ▼ to scroll to **On** or **Off**.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.

**Language**

Use this feature to change the display language that is used in all menus and screen displays. Set the display language on the telephone base and each extension separately. This telephone comes factory set for English displays.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Base setup**. Press **MENU/ENTER**.
3. Press ▲ or ▼ to scroll to **Language**. Press **MENU/ENTER**.
4. Press ▲ or ▼ to select **English**, **Español** or **Français**.
5. Press **MENU/ENTER** again to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.
Telephone base setup

**Line selection**

Use this feature to select the default telephone line to be used when you make outgoing calls. This telephone comes factory set for Auto selectable line, which chooses the first available line for making a call. To select a particular line, choose Line 1, Line 2, Line 3 or Line 4.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Line selection. Press MENU/ENTER.
4. Press ▲ or ▼ to select Auto, Line 1, Line 2, Line 3 or Line 4.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

**Set line mode**

Use this feature to individually select the line mode for each available telephone line. For the system to behave properly, it needs to be set for:

a) PBX lines, which are typical business telephone systems that require you to dial 8 or 9 to get an outside line.

-OR-

b) CO lines, which are standard residential telephone lines.

This telephone comes factory set for PBX lines.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Set line mode. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to a desired line (L1, L2, L3 or L4).
5. Press REP or SKIP to select PBX or CO.
6. Repeat Steps 4 and 5 to choose the line mode for other lines, if desired.
7. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Telephone base setup

Area codes

Use this feature to program this system to recognize one home area code and up to four local area codes. This feature makes it easy for you to place a call from the caller ID log.

If you dial seven digits to make a local call (no area code required), enter your area code into the telephone as the home area code. When you receive a call from within your home area code, the caller ID information only displays the seven digits of the telephone number, and when you dial from the call log, only seven digits are dialed.

If you must dial 10 digits (the area code and telephone number) for local calls, enter 000 for the home area code and enter your area code as a local area code. Then, if you receive a call from within your area code, the screen displays all 10 digits of the telephone number, and when you dial from the call log, all 10 digits are dialed.

If you have more than one area code for your region, enter those area codes as local area codes.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Area codes. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to Home area or Local area 1-Local area 4. Press MENU/ENTER to edit it.
5. Use the dial pad keys to enter a three-digit area code. Enter 000 for your home area code if you always dial ten-digit numbers. Press REP or SKIP to scroll to the digit you want to edit, or press REMOVE once to delete a digit; press and hold REMOVE to delete all digits.
6. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Getting started

Telephone base setup

Hold reminder
When there is a call on hold for more than three minutes, the telephone base gives you a triple beep every 30 seconds. You can set its volume to one of the three levels or turn the hold reminder off.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Hold reminder. Press MENU/ENTER.
4. Press ▲ or ▼, VOL+ or VOL- to adjust the volume or turn the setting off.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

Set date and time
The answering system displays the date and time of the message while playing messages. Before using the answering system, set the date and time as follows. If you subscribe to caller ID service, the day, month and time are set automatically with each incoming call. The year must be set so that the day of the week can be calculated from the caller ID information.

Follow the steps to set the month, day, year and time:

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Date and time. Press MENU/ENTER.
4. Using the dial pad to enter the date. Press REP or SKIP to scroll to the item you want to edit, and press the dial pad keys to enter the correct digit.
5. Press ▼ to move to the time editing.
6. Press ▲ or ▼ to select AM or PM.
7. Press REP or SKIP to scroll to the item you want to edit, and press the dial pad to enter the correct digit.
8. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

NOTES:
1. The time is in a 12-hour clock format. If you set an invalid time, you will hear an error tone while pressing MENU/ENTER to save the setting. The error tone means the setting cannot be saved. You need to correct the time entry to continue the setup process.
2. If the date and time are not set when a message is recorded, the system does not display date and time on the screen while playing messages.
Telephone base setup

Music on hold (M.O.H.)

You can choose what callers hear when placed on hold. M.O.H. is set to on by default.

You have four options:
- If you want callers you place on hold to hear nothing, turn M.O.H. off.
- If you want callers on hold to hear the default music that comes with the telephone, turn M.O.H. on but do not record your own music or voice message.
- If you want callers on hold to hear audio that you record onto the telephone, see the instructions on pages 25-26.
- If you want callers to hear audio directly streamed into the telephone, connect an audio source such as a computer, MP3 player or radio to the telephone base (page 27).

Turn M.O.H. on or off:

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Music on hold. Press MENU/ENTER.
4. Press MENU/ENTER again to select M.O.H. on/off.
5. Press ▲ or ▼ to highlight On or Off.
6. If you select On and the source is Recorded M.O.H., when you press MENU/ENTER to save the setting, Music on hold: On displays.
   -OR-
   If you select On and the source is Aux In Device with an audio device connected, when you press MENU/ENTER to save the setting, Device connected to the headset jack will be used for M.O.H. displays.

The screen returns to the previous menu. To exit without making changes, press EXIT.

NOTE: If M.O.H. is turned on, you cannot make any changes to M.O.H. settings while a call is currently on hold. The screen displays M.O.H. currently in use. Please try again later.
Getting started

Telephone base setup

Listen to the music on hold:
1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Music on hold. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to Review M.O.H. Press MENU/ENTER.
5. Press ▲ or ▼ to highlight Recorded M.O.H. or Aux In Device.

   If you select Recorded M.O.H., press MENU/ENTER to hear the current recording or the default music.

   -OR-

   If you select Aux In Device, press MENU/ENTER to hear the current music playing on your audio device that is connected to the telephone base.

   -OR-

   If you select Aux In Device but there is no audio device connected with the telephone base, No Device is connected to the headset jack at base displays on the screen. Connect an audio device to the HEADSET/AUX IN jack (as shown below), then choose Review M.O.H.

6. Press ◀REP to return to the previous menu.

Change the music on hold volume:
The music on hold volume can only be changed at the audio device.
1. Place a call to your SynJ SB67158.
2. Press HOLD on the SynJ SB67158 to place the call on hold. Listen to the music on hold to determine if the volume is desirable.
3. If you are using recorded audio and want to make adjustments to the volume on the audio device and record the audio again, start again with Step 1 of Change the music on hold volume.

   -OR-

   If you get streaming audio from a device and want to make adjustments to the volume, change the volume on the audio device while the call is on hold until you find the desired volume. When you finish listening to the audio, hang up both telephones.
Getting started

Telephone base setup

Record music or a voice message

You can record audio or music from an audio source such as a computer, MP3 player, or stereo using the audio cable provided. The recording can be up to three minutes long and plays repeatedly while a call is on hold.

**NOTE:** It is the user’s responsibility to comply with the copyright laws and to provide lawfully acquired music for the music on hold feature. Unlawful use of copyright protected music and/or lyrics may subject the user to fines and other legal action.

Record music or a message using an audio device:

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ‡ or ﬂ to scroll to **Base setup**. Press **MENU/ENTER**.
3. Press ‡ or ﬂ to scroll to **Music on hold**. Press **MENU/ENTER**.
4. Press ‡ or ﬂ to scroll to **Record new M.O.H.** Press **MENU/ENTER**.
5. Plug the small end (2.5mm plug) of the audio cable into the **HEADSET/AUX IN** jack on the telephone base and plug the large end (3.5mm plug) of the audio cable into the audio output jack on your audio device (as shown on the previous page).
6. When your audio device is ready to play, press **MENU/ENTER** on the telephone. You hear the voice prompt “Record after the tone. Press stop when you are done.” Start playing the sound or message on your audio device after the beep. The audio plays through the speakerphone and a counter on the screen shows the elapsed time. The maximum record time is three minutes, at which time the telephone automatically stops recording and the recording is saved.
7. Press **MENU/ENTER** to stop recording. The screen display returns to the previous menu. To exit without making changes, press **EXIT**.
Telephone base setup

Record music or a message using the corded handset:

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Music on hold. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to Record new M.O.H. Press MENU/ENTER.
5. When the screen shows M.O.H. record ENTER=Start, pick up the handset.
6. When your audio device is ready to play, press MENU/ENTER on the telephone. You hear the voice prompt “Record after the tone. Press stop when you are done.” Start playing your audio device or speak after the beep. The audio plays through the speakerphone and a counter on the screen shows the elapsed time. The maximum record time is three minutes, at which time the telephone automatically stops recording and the recording is saved.
7. Press MENU/ENTER to stop recording and return to the previous menu. To exit without making changes, press EXIT.

NOTES:

1. If you want to record a piece of new music or a message while the music on hold is in use, M.O.H. currently in use. Please try again later. displays on the screen.
2. If you start to record a piece of new music from an audio device but there is no audio device connected, No Device is connected to the headset jack at base. displays on the screen. Please check the connection on the telephone base and the audio device.
3. If there is silence detected for six seconds while recording or your audio device volume is too low, the recording stops and the display automatically returns to the previous menu. This means the recording was unsuccessful. The M.O.H. default music plays when calls are on hold until you successfully record new music or a message.
4. If you fail to record a message, try speaking louder into the corded handset or playing the volume louder on your audio device. If you are using the audio cable, ensure that it is fully plugged into the HEADSET/AUX IN jack.

Delete your recording to use the default music:

If M.O.H. is turned on and you do not record your own audio, the default music will play. To delete your recorded audio and go back to using the default music, you must record six seconds of silence.

1. Follow Steps 1-5 of Record music or a message using an audio device on page 25.
Getting started

Telephone base setup

2. Unplug any audio device that is connected to the **HEADSET/AUX IN** jack from the telephone base.

3. Press **MENU/ENTER** to start recording. After recording six seconds of silence, your recorded audio is deleted and the display automatically returns to the previous menu. To exit without making changes, press **EXIT**.

**Select music on hold source**

1. When the telephone is idle, press **MENU/ENTER**.

2. Press ▲ or ▼ to scroll to **Base setup**. Press **MENU/ENTER**.

3. Press ▲ or ▼ to scroll to **Music on hold**. Press **MENU/ENTER**.

4. Press ▲ or ▼ to scroll to **M.O.H. source**. Press **MENU/ENTER**.

5. Press ▲ or ▼ to highlight **Recorded M.O.H.** or **Aux In Device**.

   -OR-

If you select **Aux In Device** and the **HEADSET/AUX IN** jack is connected with an audio device, when you press **MENU/ENTER** to save the setting, **Device connected to the headset jack will be used for M.O.H. displays**.

If you select **Aux In Device** and the **HEADSET/AUX IN** jack is not connected with an audio device, when you press **MENU/ENTER** to save the setting, **No Device is connected to the headset jack at base displays**. Connect an audio device to the **HEADSET/AUX IN** jack (page 24), then choose **Review M.O.H.**

The screen returns to the previous menu. To exit without making changes, press **EXIT**.

**NOTES:**

1. If you unplug the audio device while a call is on hold, the music on hold source is immediately set to **Recorded M.O.H.** The screen displays **Recorded M.O.H. reconnect. Aux In Device reset source**.

2. If you unplug the audio device while a call is on hold, you can plug a corded headset into the **HEADSET/AUX IN** jack and activate it by pressing **HEADSET** on the telephone base.

3. If you select **Aux In Device** as the music on hold source but you want to use a corded headset, you must turn off the music on hold (see page 23) or change the source to **Recorded M.O.H.** If you try to use a corded headset without changing the setting, **To use headset, turn off M.O.H. or reset source**. displays with an error tone.

4. If you unplug your audio device from the telephone base, your music on hold source will automatically be set to **Recorded M.O.H.**
Getting started

Telephone base setup

Call alert tone

When this feature is turned on, you will hear two short beeps when you are on a call on one line and there is an incoming call on another line. You can turn this feature on or off.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Base setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Call alert tone. Press MENU/ENTER.
4. Press ▲ or ▼ to select to On or Off.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Auto attendant setup (for answering system)

You can set up the auto attendant to answer outside calls, provide callers with a company directory, automatically forward calls to a specified extension, and enable callers to record voice messages when there is no answer. You can use a default outgoing announcement or record up to five announcements of your own. For details on how to use the auto attendant feature, see the Answering system section on pages 75-77 of this user’s manual.

Record announcement (auto attendant)

Use this feature to record up to five new announcements so that you can have different announcements for different lines, or different announcements for daytime and after hours. You can easily switch among the recorded announcements. Each announcement can be up to two minutes.

The auto attendant announcement should contain instructions for the caller. Following are example scripts.

Default announcement: “Hello, this is the automated attendant. Please enter your party’s extension, followed by pound. If you are using a rotary telephone, please stay on the line. For a company directory, dial star twice.”

If you have many extensions, record a separate extension list (page 30) and reference it in your auto attendant announcement, as shown in Sample announcement 1. If you have only a few extensions, you can list them in the auto attendant announcement, as shown in Sample announcement 2 without the separate extension list.

Sample announcement 1: “Hello, you have reached XYZ Corp. Please enter your party’s extension, followed by the pound key. To hear a list of extensions, dial star twice.”

Sample announcement 2: “Hello, you have reached XYZ Corp. For sales, press 1, then pound; for service, press 2, then pound; for shipping, press 3, then pound; or press star, then pound for the receptionist.”

1. When the telephone is idle, press ANSWER ON for the desired line.
2. Press ▲ or ▼ to scroll to Setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Announcement. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to one of the announcements, Announcement 1 through Announcement 5. If no message has been recorded, (none) appears. Press MENU/ENTER.
5. Press MENU/ENTER to start recording. The timer starts counting. Lift the corded handset or face the telephone base to record your announcement.
Auto attendant setup (for answering system)

6. Press **MENU/ENTER** to stop recording. The timer stops and the recorded announcement automatically plays back.

7. Press **2** to save the setting and return to the previous menu, or press **1** to record that announcement again.

**NOTE:** Once you have recorded an announcement, **(none)** disappears.

---

**Record extension list**

Use this feature to record a list of your phone extensions that plays when the auto attendant answers a call and the user presses star twice. Use this auto attendant option when you do not want to list extension numbers in the initial message that callers hear.

**Sample extension list:** “For sales, press 1, then pound; for service, press 2, then pound; for shipping, press 3, then pound; or press star, then pound for the receptionist.”

1. When the telephone is idle, press **ANSWER ON** for the desired line.

2. Press ▲ or ▼ to scroll to **Setup**. Press **MENU/ENTER**.

3. Press ▲ or ▼ to scroll to **Record ext list**. Press **MENU/ENTER**. The current extension list plays.

4. Press **1** to select **Change**.

5. Press **MENU/ENTER** to start recording. The timer starts counting. Lift the corded handset or face the telephone base to record your extension list.

6. Press **MENU/ENTER** to stop recording. The timer stops and the recorded message automatically plays back.

7. Press **2** to save the setting and return to the previous menu, or press **1** to record the message again.

**NOTE:** The auto attendant and the private mailboxes for all extensions share the same list of announcements.
Auto attendant setup (for answering system)

Number of rings (auto attendant)

Use this feature to set the number of times the telephone rings before the auto attendant answers. The number of rings can be between 2 and 7.

1. When the telephone is idle, press ANSWER ON for the desired line.

2. Press ▲ or ▼ to scroll to Setup. Press MENU/ENTER.

3. Press ▲ or ▼ to scroll to Auto attendant. Press MENU/ENTER.

4. Press MENU/ENTER again to select Number of rings.

5. Press ▲ or ▼ to select a number (2-7).

6. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Getting started

Mailbox setup (for answering system)

You can set each telephone line mailbox separately. By default, lines 1, 2, 3, and 4 are not set to answer; the answering system is disabled and any calls to those lines will ring on all extensions.

**Number of rings (general mailbox)**

Use this feature to set the number of times the telephone rings before the mailbox answers. The number of rings can be between 2 and 7. You can also select **Toll saver**, which is explained below. Unless you change it, the general mailbox answers an incoming call after four rings.

1. When the telephone is idle, press **ANSWER ON** for the desired line.
2. Press ▲ or ▼ to scroll to **Setup**. Press **MENU/ENTER**
3. Press **MENU/ENTER** to select **Mailbox setup** or **Annc only**.
4. Press **MENU/ENTER** again to select **Number of rings**.
5. Press ▲ or ▼ to scroll to a number (2-7) or **Toll saver**.
   - **Toll saver** - the answering system answers a call after two rings when there are new messages, and after four rings when there are no new messages. This enables you to check for new messages without paying for a toll call.
6. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.

**Number of rings (announce only)**

Use this feature to set the number of times the telephone rings before the answering system plays the announcement only. The number of rings can be between 2 and 7. By default, the answering system plays the announcement only after two rings.

1. When the telephone is idle, press **ANSWER ON** for the desired line.
2. Press ▲ or ▼ to scroll to **Setup**. Press **MENU/ENTER**
3. Press **MENU/ENTER** to select **Annc only**.
4. Press **MENU/ENTER** again to select **Number of rings**.
5. Press ▲ or ▼ to scroll to a number (2-7).
6. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.
Mailbox setup (for answering system)

Record announcement (independent mailbox)

Use this feature to record up to five new announcements so that you can have different announcements for different lines. Each announcement can be up to two minutes. Please see Record announcement (auto attendant) for detailed instructions on page 29.

**NOTE:** You cannot record an announcement when the telephone system is out of space. You will hear “Memory is full.” Please refer to Remaining space on page 38.

Select announcement

Use this feature to select an announcement for your independent mailbox from the list of announcements.

1. When the telephone is idle, press ANSWER ON for the desired line.
2. Press ▲ or ▼ to scroll to Setup. Press MENU/ENTER.
3. Press MENU/ENTER again to select Mailbox setup.
4. Press ▲ or ▼ to scroll to Select announcement. Press MENU/ENTER.
5. Press ▲ or ▼ to scroll to an announcement.
6. Press MENU/ENTER to save the setting and return to the previous menu. The selected announcement plays. To exit without making changes, press EXIT.

**NOTE:** The announcements can be used for the auto attendant, general mailbox and the announce only answer mode.
Mailbox setup (for general mailbox)

Set access code (remote code)

Use this feature to enter a four-digit number (0000-9999) to allow remote access to your general mailbox from any touch-tone telephone. Unless you change it, the remote access code is 0000.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Mailbox setup. Press MENU/ENTER.
3. Press MENU/ENTER again to select Set access code.
4. Use the dial pad to enter a four-digit number. Use REMOVE to backspace and delete a digit.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

NOTES:
1. The access code must have four digits.
2. You will hear an error tone if you enter an access code that is already assigned.

Call screening

Use this feature to choose whether incoming messages can be heard over the speaker as they are being recorded. If you turn call screening on, you hear the incoming message.

If more than one incoming message comes from different telephone lines at the same time, only the first incoming message is monitored. While the telephone is recording the monitored message, you can answer the call by lifting the corded handset or by pressing ✿ SPEAKER.

If you want to mute the message playback, press MUTE on the telephone base.

Follow the steps to turn the call screening on or off:
1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Mailbox setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Call screening. Press MENU/ENTER.
4. Press ▲ or ▼ to highlight On or Off.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Mailbox setup (for general mailbox)

**Persistent hold**

By default, a call on hold after 10 minutes is automatically forwarded to the auto attendant, even if the auto attendant is not on for that line. When **Persistent hold** is enabled, the call stays on hold until it is released or hung up.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Mailbox setup**. Press **MENU/ENTER**.
3. Press ▲ or ▼ to scroll to **Persistent hold**. Press **MENU/ENTER**.
4. Press ▲ or ▼ to highlight **Off** or **On**.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.
Mailbox setup (for general mailbox)

Notify alert

Use this feature to receive notification calls to any phone number you set (such as a cellular phone or paging device) after a new message has been recorded to the general mailbox. To receive notification calls, you must save the number you wish to be notified at to the telephone base, and then set the system to call this number after it finishes recording a message.

If the number called has caller ID service, there will be an indication of the notification call. When you receive a notification call, you hear about 15 seconds of silence; then the call is ended. There is no message sent and the call is only made once. If the call is not picked up within three rings, the telephone base cancels the call. You may not receive the call if the number you set is busy, not available or off during the call.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Mailbox setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Notify alert. Press MENU/ENTER.

Set alert number:

1. Press MENU/ENTER again to select Alert call #.
2. Use the dial pad to enter the number (up to 32 digits) of the cellular phone or paging device you want to be notified.
   - Press REMOVE to backspace and delete a digit.
   - Press  SKIP or REP to move the cursor to the left or right.
3. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

Turn alert on or off:

1. Press ▲ or ▼ to scroll to Alert on/off. Press MENU/ENTER.
2. Press ▲ or ▼ to scroll to On or Off.
3. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Mailbox setup (for general mailbox)

Call alert confirmation:
You can confirm whether the system can successfully call the alert number that you entered.

1. Press ▲ or ▼ to scroll to Calling alert #. Press MENU/ENTER.
2. The screen displays Press SPKR to confirm the alert call.
3. Press ➡️ SPEAKER on the telephone base. You should hear the telephone number being dialed. To exit without making changes, press EXIT.
4. After confirming that the call went to the telephone number you specified, press ➡️ SPEAKER again to end the test. The screen returns to idle mode.

NOTES:
1. If you turn on Notify alert before you enter the alert number, Please set the alert #. appears on the screen.
2. The called telephone hears silence when the system calls the alert number.
3. To initiate a call alert call again, do the first three steps of the Call alert confirmation section (above).

Voice language
You can select a language (English, Spanish or French) to be used for the voice prompts in the answering system.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Mailbox setup. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to Voice language. Press MENU/ENTER.
4. Press ▲ or ▼ to select English, Español or Français.
5. Press MENU/ENTER again to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.
Getting started

Mailbox setup (for general mailbox)

**Remaining space**

Use this feature to check the amount of space currently in the system for the estimated remaining recording time and number of messages.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Mailbox setup**. Press **MENU/ENTER**.
3. Press ▲ or ▼ to scroll to **Remaining space**. Press **MENU/ENTER**.
4. After checking the screen display, press ◀REP to return to the previous menu.
Mailbox setup (for handset/deskset)

You can access handset/deskset mailboxes from the telephone base. For detailed instructions, refer to Handset mailbox overview in the SynJ SB67108 handset user’s manual or Deskset mailbox overview in the SynJ SB67148 deskset user’s manual.

Fast answer mode

When fast answer mode is turned on for any extension, calls to that extension are answered by the auto attendant after 2 rings. When turned off, calls are answered by the auto attendant after 5 rings. Please refer to Fast answer mode on or off in the SynJ SB67108 handset user’s manual or the SynJ SB67148 deskset user’s manual for more information.

1. When the telephone is idle, press (Messages) on the telephone base.
2. Press the one-touch EXT 1-0 key for the destination extension mailbox.
3. Use the dial pad to enter the four-digit remote access code of the extension. Use REMOVE to backspace and delete a digit. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to Fast answer mode. Press MENU/ENTER.
5. Press ▲ or ▼ to select On or Off.
6. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

Handset/deskset announcement setup

The announcement is the greeting callers hear when calls are answered by the handset/deskset mailbox. You can set or change handset/deskset announcement using the telephone base.

The default announcement is “Hello, please leave a message after the tone.” You can use this announcement or replace it with your own recording.

Your announcement can be up to two minutes.

1. When the telephone is idle, press (Messages) on the telephone base.
2. Press the one-touch EXT 1-0 key for the destination extension mailbox.
3. Use the dial pad to enter the four-digit remote access code of the extension. Use REMOVE to backspace and delete a digit. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to Handset annncemnt. Press MENU/ENTER.
Getting started

Mailbox setup (for handset/deskset)

1. The system automatically plays the current handset announcement. A timer appears on the screen and starts counting. The screen displays **1=Change  2=OK**.

2. Press **1** to record that announcement again. The screen displays **Record anncemnt ENTER=Start**. Press **MENU/ENTER**. The system announces “Record after the tone. Press stop when you are done.” You hear a reminder beep and the timer starts counting. Lift the corded handset or face the telephone base to record your announcement.

3. Press **MENU/ENTER** when finished. The timer stops and the recorded announcement automatically plays back.

4. Press **2** to use the new recorded announcement.

   -OR-

   Press **1** to record that announcement again.

---

**Switch to general mailbox**

You can directly access the general mailbox of any handset or deskset using the telephone base.

1. When the telephone is idle, press **(Messages)** on the telephone base.

2. Press the one-touch **EXT 1-0** key for the destination extension mailbox.

3. Use the dial pad to enter the four-digit remote access code of the extension. Use **REMOVE** to backspace and delete a digit. Press **MENU/ENTER**.

4. Press **▲** or **▼** to scroll to **To general MBox**. Press **MENU/ENTER**.

   -OR-

   To exit without making changes, press **EXIT**.
Speed dial setup

The telephone base has 10 speed dial locations where you can store the telephone numbers you wish to dial using fewer keys than usual. You can store up to 32 digits in each location.

**Enter, edit or delete a speed dial number**

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▲ or ▼ to scroll to **Speed dial setup**. Press **MENU/ENTER**.
3. Press ▲ or ▼ to choose the desired speed dial location, then press **MENU/ENTER**.
4. Use the dial pad to enter or edit the telephone number up to 32 digits. If you want to delete the entry, erase all the digits.
   - Press **REP** or **SKIP** to move the cursor to the left or right.
   - Press **REMOVE** to backspace and delete a digit.
   - Press and hold **REMOVE** to delete all digits.
5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press **EXIT**.

**NOTES:**

1. See **Calling a speed dial number** on page 45 for instructions on calling a speed dial number.
2. The memory locations for speed dial and the directory are not the same, so setting up speed dial numbers does not decrease your directory storage space.

**Customer support**

Use this feature to display the AT&T website.

1. When the telephone is idle, press **MENU/ENTER**.
2. Press ▼ to scroll to **Customer support**. Press **MENU/ENTER**.
3. To exit, press **EXIT**.

| Confirmation tone | Command completed successfully. |
Getting started

Screen icons, indicator tones and lights

**Indicator lights:**

- **NEW CALL indicator**
  On when there are new or missed calls in the call log.

- **(Messages) indicator**
  Flashes when there are new or missed messages in the general mailbox.

- **LINE 1-LINE 4 indicator**
  On when a telephone line is in use.
  Flashes slowly when a telephone line is on hold.
  Flashes rapidly when there is an incoming call.

- **ANSWER ON indicator**
  On when the general mailbox is on and ready to receive calls.

- **HEAEDSET indicator**
  On when the corded headset is in use.

- **DND indicator**
  On when the do not disturb function is on.

- **MUTE indicator**
  Flashes slowly when the corded handset microphone or speakerphone is muted.

- **SPEAKER indicator**
  On when the speakerphone is on.
Telephone base operation

Telephone base basic operation

The telephone comes programmed to use line 1 (default primary line) for calls when you do not press a line key. (To change the primary line, see Line selection on page 20.) When you answer a call, the telephone automatically selects the ringing line.

Line indicators

Each of the four indicators on LINE 1-LINE 4 indicate the state of the corresponding telephone line.

- On when the corresponding line is in use.
- Flashes slowly when the line is on hold.
- Flashes slowly when there is a transferred call on the corresponding line.
- Flashes slowly when there is an incoming auto attendant transferred call on the corresponding line.
- Flashes rapidly when there is an incoming call on the corresponding line.

Making a call

To make a call from the telephone base:

1. Lift the handset or press 🔊 SPEAKER.
   -OR-
   To override automatic line selection, press LINE 1-LINE 4 for the desired line, then lift the handset.

2. Wait for a dial tone, then enter the telephone number.
   The screen displays the elapsed time as you talk (in hours, minutes and seconds).

To end a call from the telephone base:

Place the handset on the telephone base to hang up.

-OR-

If you are using the speakerphone, press 🔊 SPEAKER to hang up.

NOTE: The elapsed time is not affected by accessing services from your telephone service provider.
Telephone base operation

Telephone base basic operation

To make a call with a corded headset:
Make sure a corded headset is connected to the telephone base (page 14).
1. Press HEADSET on the telephone base.
2. Wait for a dial tone, then dial the number.
3. To hang up, press HEADSET.

To make a call with a cordless headset:
You can make a call using a registered cordless headset and the dial pad on the telephone base.
1. Press the ON/OFF button on the cordless headset.
2. Wait for a dial tone, then dial the number on the base.
3. To hang up, press the ON/OFF button.

On hook dialing (predialing)
1. Enter the telephone number. Press REMOVE to delete any misdialed digits and make corrections, if needed.
2. Lift the handset or press ☎️ SPEAKER to dial.

-OR-
To override automatic line selection, press LINE 1-LINE 4 for the desired line, then lift the handset.

Using the speakerphone
During a call, press ☎️ SPEAKER to switch between handsfree speakerphone and normal handset use. Press ☎️ SPEAKER again or place the handset on the telephone base to hang up.

Calling a speed dial number
1. Press and hold a dial pad key (1-0) to display the speed dial number.
2. Lift the handset, press ☎️ SPEAKER or HEADSET.

-OR-
To override automatic line selection, press LINE 1-LINE 4 for the desired line, then lift the handset.

NOTE: If there is no telephone number stored in the speed dial location, No number displays on the screen.
Telephone base operation

TelephoneNumber base basic operation

Answering a call

To answer a call:

- Lift the handset, press \( \text{SPEAKER, HEADSET or the ON/OFF} \) button on a registered cordless headset.

  - OR -

  To override automatic line selection, press \text{LINE 1-LINE 4} for the desired line, then lift the handset.

Temporary ringer silencing

Press \text{MUTE} while the telephone is ringing to silence the ringer temporarily on the telephone base only. This turns off the ringer without disconnecting the call. The next incoming call rings normally at the preset volume.

Last number redialing

The last 10 telephone numbers dialed (up to 32 digits) are stored in system memory.

To view the 10 most recently dialed numbers:

1. Press \text{PAUSE/REDIAL} to enter the redial list and display the most recently called number.

2. Press \( \text{or } \) or press \text{PAUSE/REDIAL} repeatedly to view other recently called numbers.

3. Press \text{EXIT} to exit the redial list.

To redial a number:

- To dial the displayed number, lift the handset, or press \( \text{SPEAKER or HEADSET.} \)

- To override automatic line selection, press \text{LINE 1-LINE 4} for the desired line, then lift the handset.

To edit a number:

While the desired number displays, press \text{MENU/ENTER} to enter editing mode.

- Press \( \text{REP or SKIP} \) to move the cursor to the left or right.

- Press \text{REMOVE} to backspace and delete a digit.

- Press \text{PAUSE/REDIAL} to enter a 3.5 seconds dialing pause (a \text{P} appears) (page 62).

- Press \text{FLASH} to enter a flash (page 62).

To delete a number:

- While the screen displays the desired number, press \text{REMOVE} to delete the number from the redial memory.
Options while on calls

Volume control

While on a call, press \textbf{VOL+} or \textbf{VOL-} to adjust the listening volume.

\textbf{NOTES:}

1. The corded headset and corded handset volume settings are the same, but they are independent from the speakerphone.
2. While using the volume control, you hear a triple beep when you have reached the minimum or maximum level.

Call waiting

If you subscribe to call waiting service with your telephone service provider, and someone calls while you are in the middle of a call, you hear a beep.

- Press \textbf{FLASH} to put your current call on hold and take the new call.
- Press \textbf{FLASH} at any time to switch back and forth between calls.

\textbf{NOTES:}

1. If you miss a call while the line is in use, the caller ID of the missed call displays for 15 seconds after your current conversation ends.
2. For more information on caller ID with call waiting, see page 66.
Options while on calls

Call privacy

To ensure call privacy, this telephone allows only one set at a time to use a line. You can also block all system handsets from joining a phone conversation (see page 51 for instructions for joining calls).

To enable call privacy:

- During the call, press MENU/ENTER twice to select call privacy. The screen displays -PRIV. Any other extensions are dropped and no extensions can join the call. If another extension tries to access the line you are using, its screen displays Privacy.

To cancel call privacy:

- During the call, press MENU/ENTER twice to cancel call privacy and continue with the conversation. The icon -PRIV disappears from the screen. Other telephones can now join the call by pressing the appropriate line key.

NOTES:

1. Call privacy is automatically canceled when you end or transfer a call.
2. You cannot set call privacy during intercom or conference calls.
3. Call privacy applies only to system telephones. It does not affect non-system phones using the same line(s).
Options while on calls

Recording a call

Use this feature to record two-way phone conversations during a call. The recording is treated the same as memos and is always marked as a new message in the mailbox. However, the (Messages) indicator does not flash for new or missed recorded calls. You cannot record a conference call or an intercom call and you cannot use another line while you are recording a phone conversation.

To record a call:

1. While on a call, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to Record call ON. Press MENU/ENTER.
3. The recording starts and the system activates call privacy. The screen displays -PRIV and -REC, and the timer starts counting while recording.
4. To stop recording and continue the call, press MENU/ENTER twice. The system saves the conversation into the general mailbox.

-OR-

The recording ends when you disconnect the call.

While recording a phone conversation:

The other party hears a short beep when the recording begins and once each minute during the recording. To ensure compliance with state and federal regulations regarding the recording of a telephone call, you should start the recording process and inform the caller that you are recording the call.

To play back a memo or phone conversation:

Play memos or two-way phone conversations the same way as messages are played. (see Message playback on page 78).

NOTES:

1. Call privacy is automatically on when recording a call.
2. Calls that you record use the same memory as the answering system. Recording long conversations uses up space otherwise available for recording normal messages. Please see Remaining space on page 38.
Options while on calls

Mute

Use this feature during a telephone conversation to silence the microphone. You can hear the caller, but the caller cannot hear you.

To mute a call:

- Press MUTE. When mute is on, the MUTE light flashes; the screen also flashes -MUTE.

To take a call off mute:

- Press MUTE again and resume speaking.

**NOTE:** Transferring the call, changing lines or putting a call on hold also cancels the mute function.

Hold

Use this feature to hold one line while accessing another, or as part of the conference and call transfer features.

While on a call, press and release HOLD. The LINE 1-LINE 4 indicator for the line on hold flashes slowly in red. After the call has been on hold for more than three minutes, you will hear a triple beep every 30 seconds. (To adjust the volume of the reminder tone or turn it off, see **Hold reminder** on page 22).

If you are using the speakerphone, the speakerphone turns off automatically when you press HOLD.

To release the hold, press and release LINE 1-LINE 4 of the call on hold.

**NOTES:**

1. By default, a call on hold after 10 minutes is automatically forwarded to the auto attendant, even if the auto attendant is not activated for that line. If **Persistent hold** is enabled (see page 35), the call will stay on hold until it is released or hung up. To keep a call on hold longer than 10 minutes, you can also release the held call within 10 minutes and then place the call on hold again.

2. You cannot put an intercom call on hold.

Switching between lines

Use this feature to switch between lines during an outside call:

1. Press LINE 1-LINE 4 of another telephone line to make or answer another call. The current call is put on hold automatically.

2. To return to the first call, press the original LINE 1-LINE 4. The second line is put on hold automatically.
Options while on calls

Join a call in progress

Use this feature to join in an ongoing call on any line that does not have call privacy set (see Call privacy on page 48 for more information). The corresponding line icon appears on the screen when the line is in use.

- Press and hold the desired LINE 1-LINE 4 on the telephone base to join in the call, which becomes a three-way conference (page 51).

**NOTE:** When you try to join an ongoing call on a line with call privacy on, the screen displays **Privacy** and you hear four beep tones.

Chain dialing

While you are on a call, you can initiate a dialing sequence from the numbers in the directory.

Chain dialing can be useful if you wish to access other numbers (such as bank account numbers or access codes) from the directory.

**To access the directory while on a call:**

1. During the call, press **DIR**, then press ▲ or ▼ to review the directory.

2. To dial the displayed number, press **MENU/ENTER**. To exit without making changes, press **EXIT** or **REP** and continue with the conversation.

**NOTE:** You cannot edit a directory entry while on a call. See page 65 for more details about the directory.

Three-way conference calls

Use this feature to set up a three-party call by using two lines at the same time. You can also join an intercom call with a call on an outside line. The outside line call must be established first because an intercom call cannot be placed on hold.
Telephone base operation

Options while on calls

**To make a three-way conference call:**
1. Make or answer an outside call.
2. Press **HOLD** and call someone on another line, or start an intercom connection.
   - **OR**
   Call someone on another line, or intercom someone. The first line is automatically put on hold.
3. Press **CONF** at any time to begin the three-party conference.

**To talk privately with one external party:**
1. Press **HOLD** to place both lines on hold.
2. Press **LINE 1-LINE 4** to talk privately with the person on that line.
3. Press **CONF** to resume the conference call.

**To talk privately with one internal party:**
1. Press **HOLD** to talk privately with the person on that handset/deskset. The external line is automatically placed on hold.
2. Press **CONF** to resume the conference call.

**To drop one line:**
1. Press **LINE 1-LINE 4** to activate the line you want to drop and place the handset on the telephone base to hang up or press ⏯ **SPEAKER**. The other line is put on hold automatically.
2. Press **LINE 1-LINE 4** to resume the call and lift the handset on the telephone base.

**To drop an intercom:**
- Press **LINE 1-LINE 4** to activate the external call. The intercom call drops automatically.

**To end a conference call:**
- Place the handset on the telephone base to hang up or press ⏯ **SPEAKER**. The call does not terminate until all extensions hang up.

**NOTES:**
1. If an internal party hangs up, the ongoing call becomes a two-way conversation.
2. You cannot make any conference calls if all four telephone lines are in use.
3. If you are experiencing difficulty in using the conference features on this telephone, please consider using AT&T’s complete line of teleconference services to find a solution that best meets your needs. AT&T TeleConference Services reduces travel time and expenses while increasing productivity wherever people are located, enabling you to host truly virtual meetings and share important information in real time. To sign up for AT&T TeleConference Services, go to: [www.att.com/orderconference](http://www.att.com/orderconference) for details.
Telephone base operation

COVM

COVM (central office voicemail)

If you subscribe to voicemail service with your telephone service provider, turn on the COVM feature. This feature displays COVM on the screen above the line key of any telephone line that receives new voicemail messages.

If you do not subscribe to voicemail service or want to disable the indicator, turn off the COVM feature.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to COVM. Press MENU/ENTER.
3. Press MENU/ENTER again to select COVM on/off.
4. Press ▲ or ▼ to select On or Off.
5. Press MENU/ENTER to save the setting and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

COVM reset

Use this feature when the telephone indicates there is new voicemail but there is none. For example, when you have accessed your voicemail while away from the building. This feature only turns off the COVM indicator; it does not delete your voicemail messages. As long as you have new voicemail messages, your telephone service provider continues to send the signal to turn on the indicator. You can reset COVM indicators individually or for all the telephone lines using the All COVM reset command.

1. When the telephone is idle, press MENU/ENTER.
2. Press ▲ or ▼ to scroll to COVM. Press MENU/ENTER.
3. Press ▲ or ▼ to scroll to COVM reset. Press MENU/ENTER.
4. Press ▲ or ▼ to scroll to COVM 1 reset—COVM 4 reset to clear the COVM indicator of a telephone line, or scroll to All COVM reset to clear the indicators for all the line.
5. Press MENU/ENTER to execute the command and return to the previous menu. There is a confirmation tone. To exit without making changes, press EXIT.

NOTE: For information about using your voicemail service, contact your telephone service provider for assistance.
Intercom

You can use the intercom feature for conversations between the telephone base and an accessory device, or between two accessory devices. When the system is on one or more external calls, accessory devices can make intercom calls with each other. If you have a cordless headset, it can only receive intercom calls.

Each device that is registered to the telephone base is assigned an extension. Extension numbers are assigned in sequential order (0-9) as they are added. If you register a cordless headset, it is always assigned extension number 0. See pages 10-12 for information on adding and registering devices to your telephone base.

**NOTE:** A telephone base connected to AC power but not to any telephone lines can still make intercom calls with charged and registered accessory cordless accessory.

Make an intercom call to a cordless handset/deskset

Press the one-touch **EXT 1-0** key for the destination extension or press the **INT/PTT ALL** key, then lift the handset. The screen displays **Calling X:Handset X** (X represents the extension number [1-0], **Handset X** represents the handset name), **Calling X:Deskset X** (X represents the extension number [1-0], **Deskset X** represents the deskset name) or **Calling All**.

-OR-

Press **INT** key on the telephone base, then scroll to the destination extension. Press **MENU/ENTER**.

**NOTES:**

1. Before the intercom call is answered, you can cancel the intercom by pressing **SPEAKER**, lifting and resetting the handset, or by pressing the corresponding **LINE 1-LINE 4** to resume a call.
2. The intercom call automatically cancels if the call is unanswered after one minute.
3. Press **MUTE** to temporarily silence the intercom ringer.
4. When you choose **All** in the menu, all the extensions and the telephone base ring. The intercom call is established with the first extension to answer the call.
5. If a line is in use, pressing **INT** places the line on hold and activates the intercom.
Telephone base operation

Intercom

Answer an intercom call

When you receive an intercom call, you hear a ringing tone and your screen displays **Call X: Handset X** (X represents the extension number [1-0], **Handset X** represents the handset name) or **Call X: Deskset X** (X represents the extension number [1-0], **Deskset X** represents the deskset name). Answer an intercom call just as you would answer a normal call.

End an intercom call

End an intercom call just as you would end a normal call.

Make another intercom call while on an intercom call

You can make an intercom call to another destination extension while on an intercom call. The first intercom automatically disconnects. While on an intercom call:

Press the one-touch **EXT 1-0** key or the **INT/PTT ALL** key for another destination extension. The screen displays **Calling X:Handset X** (X represents the extension number [1-0], **Handset X** represents the handset name), **Calling X:Deskset X** (X represents the extension number [1-0], **Deskset X** represents the deskset name) or **Calling All**.

**-OR-**

Press **INT** on the telephone base, then scroll to the destination extension. Press **MENU/ENTER**.

**NOTES:**

1. Before the intercom call is answered, you can cancel the intercom by pressing **SPEAKER**, lifting and resetting the handset, or by pressing the corresponding **LINE 1-LINE 4** to resume a call.
2. The intercom call automatically cancels if the call is unanswered after one minute.
3. Press **MUTE** to temporarily silence the intercom ringer.
4. When you choose **All** in the menu, all the extensions and the telephone base ring. The intercom call is established with the first extension to answer the call.

Answer an incoming call during an intercom call

If you receive an incoming outside call during an intercom call, there is an alert tone.

To answer the call, press **LINE 1-LINE 4**. The intercom call ends automatically.
Call transfer

You can transfer a call to any other system telephone. Once you transfer a call, it can be answered by any system telephone, not just at the extension you called.

Blind transfer

While on a call, you can transfer a call directly without notifying the desired extension:

1. Press XFER on the telephone base.
2. Press the one-touch EXT 1-0 key for the desired extension.

-OR-

Press ▲ or ▼ to scroll to the desired extension, then press MENU/ENTER.

3. The current line is put on hold. The destination handset rings and the call is answered by pressing L 1-L 4. You hear a short tone from the telephone base. The outside call is automatically transferred to the desired extension.

4. Put the corded handset on the telephone base or press ➻ SPEAKER to hang up.

-OR-

You can resume the call by pressing the corresponding flashing line key LINE 1-LINE 4 before the desired extension answers the call.

You hear a triple beep every 30 seconds when a transferred call has not been answered (To adjust the volume of the reminder tone or turn it off, see Hold reminder on page 22).

NOTES:

1. If the desired extension does not answer the intercom call within one minute, the extension rings as an incoming call to remind the extension user.
2. If the outside call is put on hold for 10 minutes and Persistent hold is disabled (see page 35), it is automatically transferred to the auto attendant. The telephone base returns to idle mode.

Transfer a call and speak to the receiving party

You can transfer a call and speak to the receiving party before completing the transfer while on a call:

1. Press XFER on the telephone base.
2. Press the one-touch EXT 1-0 key for the desired extension.
Call transfer

-OR-

Press ▲ or ▼ to scroll to the desired extension, then press MENU/ENTER.

3. The current line is put on hold. The destination extension rings and the call is answered. You can announce the call. There is an intercom call between the corded handset and the extension.

4. Put the corded handset on the telephone base or press ✪ SPEAKER to hang up. The outside call is automatically transferred to the desired extension.

-OR-

You can resume the call by pressing the corresponding flashing line key LINE 1-LINE 4 before the desired extension answers the call.

You hear a triple beep every 30 seconds when a transferred call has not been answered (To adjust the volume of the reminder tone or turn it off, see Hold reminder on page 22).

NOTES:

1. If the desired extension does not answer the intercom call within one minute, the extension rings as an incoming call to remind the extension user.

2. If the outside call is put on hold for 10 minutes and Persistent hold is disabled (see page 35), it is automatically transferred to the auto attendant. The telephone base returns to idle mode.

Answer a transferred call

When you hear a short intercom ring from the telephone base:

Lift the handset to intercom with an extension. You can talk privately with the extension before picking up the outside call that is on hold. Press the blinking LINE 1-LINE 4 when you are ready to talk to the outside call.

Other options for answering the transferred call:

- To answer using the telephone base speakerphone, press ✪ SPEAKER before pressing LINE 1-LINE 4.
- To answer handsfree using the corded headset, press HEADSET before pressing LINE 1-LINE 4.
- To answer handsfree using the cordless headset, press ON/OFF on the headset before pressing LINE 1-LINE 4.
Telephone base operation

Push to talk (PTT) intercom

You can directly broadcast messages to the speakerphone of any extension. The extension you called can respond by pressing the INT key to begin a two-way communication. Any registered cordless handset/deskset can make PTT calls with each other or with the telephone base. Up to five pairs of PTT calls can be maintained at a time.

PTT to a single device

1. When the system is idle, press and hold the one-touch EXT 1-0 key of the destination party. When the connection is made, both the caller and the destination party hear two beeps. The telephone base screen shows PTT to: X:Handset X Release PTT key to stop (X represents the extension number [1-0], Handset X represents the handset name) or PTT to: X:Deskset X Release PTT key to stop (X represents the extension number [1-0], Deskset X represents the deskset name).

2. Speak into the base speakerphone while continuing to hold down the one-touch EXT 1-0 key. Your voice is broadcast to the desired extension.

3. Release the one-touch EXT 1-0 key after speaking. There is a three-second PTT wait state with -MUTE slowly flashing on the screen and the MUTE indicator flashing. During the PTT wait state, if necessary, you can press and hold the previous one-touch EXT 1-0 key or the INT/PTT ALL key to continue speaking into the base speakerphone.

4. The destination party can now respond (see Answer a PTT call in the SynJ SB67108 handset manual or SynJ SB67148 deskset manual).

PTT to all devices

1. When the telephone base is idle, press and hold the INT/PTT ALL key to automatically activate the speakerphones of all the extensions. Both the caller and the destination parties hear two beeps.

2. Speak into the base speakerphone. Your voice is broadcast to all extensions. Release the INT/PTT ALL key after speaking. There is a three-second PTT wait state with -MUTE slowly flashing on the screen and the MUTE indicator flashing. During the PTT wait state, if necessary, you can press and hold the INT/PTT ALL key to continue speaking into the base speakerphone.

3. Any extension can reply. The first extension to reply will either convert the call into a normal intercom call with the caller or start a new PTT call. See Answer a PTT call in the SynJ SB67108 handset manual or SynJ SB67148 deskset manual.
Telephone base operation

Push to talk (PTT) intercom

Answer a PTT call

1. When you hear two beeps, the screen displays **PTT from: X:Handset X** (X represents the extension number [1-0], **Handset X** represents the handset name), or **PTT from: X:Deskset X** (X represents the extension number [1-0], **Deskset X** represents the handset name).

2. Press **INT** to convert the call into a normal intercom call with that extension.

   **-OR-**

   Respond with a new PTT call. Wait for the end of the three-second PTT wait state (the screen changes to idle mode). To respond with the telephone base, see **PTT to a single device** or **PTT to all devices** on the previous page. To respond with a handset, see **Answer a PTT call** in the SynJ SB67108 handset manual or SynJ SB67148 deskset manual.

**NOTE:** If the PTT call is sent to all handsets, an intercom call is established with the first person who presses **INT**.

Convert a PTT call to an intercom call

You can convert the PTT call to a two-way intercom call on the called telephone base.

1. Press **INT** on the called extension to convert the call to a two-way intercom call.

2. Optionally, put the corded handset on the telephone base or press **Speaker** to end the intercom.

End a PTT call

- Press **EXIT** to end the incoming PTT call.
About the directory

Use the directory to store names and phone numbers. Directory entries are not shared with other extensions. Each handset has its own directory.

Capacity

The directory of this telephone base can store up to 100 entries, with a maximum of 16 alphanumeric characters (including spaces) for names and 32 digits for telephone numbers. A convenient search feature can help you quickly find and dial numbers (page 64).

If there are already 100 entries, the screen shows **Memory is full**. You cannot store a new number until you delete one. If you try to view the directory when there are no entries, the screen displays **Directory empty**.

Exit the directory

On the telephone base, press **EXIT** to cancel an operation and return to idle mode.

If you pause for too long while creating or reviewing an entry, the procedure times out and you have to begin again.
Create directory entries

Create a new directory entry

Use the following steps to store a name and number in the directory.

1. When the telephone is idle, press **MENU/ENTER** twice to select **Directory**.

   -OR-

   Press **DIR** on the telephone base.

2. Press **MENU/ENTER** to add an entry.

3. Enter the telephone number (up to 32 digits) using the dial pad when prompted.
   - Press **REP** or **SKIP** to move the cursor to the left or right.
   - Press **REMOVE** to backspace and delete a digit.
   - Press and hold **REMOVE** to erase all digits.
   - Press **PAUSE/REDIAL** to enter a 3.5 seconds dialing pause (a **P** appears) (page 62).
   - Press **FLASH** to enter a flash (page 62).

4. Press **MENU/ENTER** to move on to the name. Enter the name when prompted.
   - Use the dial pad to enter a name (up to 16 characters). Each time you press a key, the character on that key appears. Additional key presses produce other characters on that key. See the following chart.

</table>
Create directory entries

- Press **REP** or **SKIP** to move the cursor to the left or right.
- Press **REMOVE** to backspace and delete a character.
- Press and hold **REMOVE** to erase all characters.
- Press **0** once to add a space.

5. Press **MENU/ENTER** to save the setting and return to the previous menu. There is a confirmation tone. The name and the telephone number appear on the screen. To exit without making changes, press **EXIT**.

Store a pause in a directory number

Use this feature to include a pause in a number stored in the directory. You might need a pause in a directory number to enable access to automated telephone systems.

- When you wish to enter a pause in the dialing sequence, press **PAUSE/REDIAL** to store a 3.5 seconds pause. A **P** appears in the telephone number. Each pause counts as one digit. If you want to save the number in the directory, press **MENU/ENTER**.

Store a flash in a directory number

Use this feature to store the flash needed to access certain custom-calling services in a directory number.

- When you wish to enter a flash in the dialing sequence, press **FLASH**. An **F** appears in the telephone number. Each flash counts as one digit. If you want to save the number in the directory, press **MENU/ENTER**.
Review directory

Review directory entries

1. When the telephone is idle:

   Press **MENU/ENTER** twice to select *Directory*.

   **-OR-**

   Press **DIR** on the telephone base.

   If there are no directory entries, the screen displays *Directory empty*.

2. Press ▲ or ▼ to browse through the directory. Entries appear alphabetically by the first letter in the name.
Search directory

Search by name

Follow the steps to search for directory entries on the telephone base.

1. When the telephone is idle, press **MENU/ENTER** twice to select **Directory**.
   - **OR-**
   Press **DIR** on the telephone base.

2. Press ▲ or ▼ to browse through the directory.

3. When a name appears, press the dial pad keys (2-9) to start a name search.
   - The directory shows the first name beginning with the first letter associated with the dial pad key if there is an entry in the directory beginning with that letter. If there is no entry matching the letter you press, it remains in the current entry.

4. To see other names starting with the letters on the same dial pad key, keep pressing the key. The names appear in alphabetical order.

For example, if you have the names **Jennifer**, **Jessie**, **Kevin** and **Linda** in your directory:

- If you press **5 (JKL)** once, you see **Jennifer**.
- If you press **5 (JKL)** twice, you see **Kevin**.
- If you press **5 (JKL)** three times, you see **Linda**.
- If you press **5 (JKL)** four times, you see **Jennifer**.
- To view **Jessie**, press ▼ while **Jennifer** is displayed.
Dial, delete or edit entries

You can dial, delete or edit a directory entry (name and number) when it is shown on the telephone base screen. You can use the directory review or search (pages 63-64) to show an entry.

Display dial

When a number is displayed on the screen, you can dial the number by lifting the corded handset, pressing \( \text{SPEAKER} \) or \( \text{LINE 1-LINE 4} \) for the desired line.

Delete an entry

When a directory entry appears, press \( \text{REMOVE} \) on the telephone base to delete the displayed entry from the directory. You cannot retrieve a deleted entry.

Delete all entries

1. When the telephone is idle, press \( \text{MENU/ENTER} \) twice to select Directory.

-OR-

Press \( \text{DIR} \) on the telephone base.

2. Press \( \text{REMOVE} \) and the screen displays Delete entire directory? <=No >=Yes. Press \( \text{SKIP} \) to confirm or press \( \text{REP} \) to return to the previous screen.

NOTE: You cannot retrieve deleted entries.

Edit an entry

1. When a directory entry appears, press \( \text{MENU/ENTER} \).

2. Follow Steps 3 to 5 on pages 61-62.

NOTE: If the telephone number in the directory exceeds 16 digits, \( < \) appears in front of the telephone number in the editing screen. Press \( \text{REP} \) to move towards the beginning of the telephone number or press \( \text{SKIP} \) to move towards the end of the telephone number.
About caller ID

This telephone supports caller ID services that most telephone service providers offer. Caller ID allows you to see the name, number, date and time of calls. Depending on your service subscription, you might see the caller’s number, or the caller’s name and number from the telephone service provider after the first or second ring. Caller ID information might not be available for every incoming call. Callers may intentionally block their names and/or telephone numbers.

This product can provide information only if both you and the caller are in areas offering caller ID service and if both telephone service providers use compatible equipment.

Information about caller ID with call waiting

Caller ID with call waiting lets you see the name and telephone number of the caller before answering the telephone, and while on another call.

There are fees associated with caller ID services. In addition, this service might be called by different names (such as caller ID with visual call waiting) by different telephone service providers and might not be available in all areas.

It might be necessary to change telephone service to use this feature. Contact your telephone service provider if:

- You have both caller ID and call waiting, but as separate services (you might need to combine these services).
- You only have caller ID service, or only call waiting service.
- You do not subscribe to caller ID or call waiting services.

NOTES:

1. You can use this telephone with regular caller ID service, or you can use this telephone’s other features without subscribing to caller ID or caller ID combined with call waiting service.
2. The format of telephone numbers displayed depends on the home and local area codes you set (See Area codes on page 21 for explanations and instructions on area code settings).
Caller ID Information

How the caller ID information (call log) works

The telephone stores caller ID information for the last 50 incoming calls in the telephone base. Entries are stored in reverse chronological order. The telephone deletes the oldest entry when the log is full to make room for new calls.

Each extension has independent caller ID information. Deleting the caller ID information on any one extension does not affect the caller ID information on other extensions.

If you answer a call before the information appears on the screen, it does not show in the caller ID information.

Review the caller ID information to determine who called, to easily return the call, or to copy the caller’s name and number into your directory.

NEW CALL indicator turns on and XX Missed call(s) appears if there are new call log entries (including new or missed calls).

The time and date of the call and the caller’s name and telephone number are included in the display.

Caller ID information appears on the screen when the telephone rings, until the caller hangs up, the call has been answered at another extension, or the call ends.

If you subscribe to caller ID service, this phone automatically resets the time and date each time new call information is received. You can also set the time and date yourself (see Set date and time on page 22).

NOTES:

1. The caller ID information might not be available for every incoming call. Callers might intentionally block their names and/or telephone numbers.

2. Each entry can store up to 32 digits for the telephone number and 16 characters for the name. If the telephone number has more than 16 digits but less than or equal to 24 digits, only the last 17 digits appear. If the telephone number has more than 24 digits, only the 8th to 24th digits (17 digits) appear. In order to view the entire number, you must first save the entry to the directory (see page 70). For instructions on viewing the digits, see page 68. If the telephone number has more than 32 digits, it is not saved or shown in the call log.
Caller ID operation

Memory match

If the incoming telephone number is an exact match with a telephone number in your directory, the name that appears on the screen matches the corresponding name in your directory.

For example, if Christine Smith calls, her name appears as Chris if this is how you entered it into your directory.

**NOTE:** The number you see on your caller ID is in the format from the telephone service provider. It usually delivers 10-digit telephone numbers (area code plus telephone number). The telephone system ignores the area code when searching for a match and displays the name of the first corresponding number from the directory.

Missed (new) calls indicator

When the telephone base is in idle mode and has new or missed calls, its screen shows **XX Missed call(s)**.

All new or missed entries are counted as missed calls. Each time you review a call log entry with the icon new, the number of missed calls decreases by one. When all the entries in the caller ID information become old (have been reviewed), the system removes the missed calls alert from the display, and the **NEW CALL** indicator turns off.

Review the caller ID information

1. When the telephone is idle, press **CALL LOG**.

   -OR-

   When the telephone is idle, press **MENU/ENTER**. Press ▲ or ▼ to scroll to **Call log**. Press **MENU/ENTER**.

2. Press ▲ or ▼ to review the caller ID information. The call log entries are stored in reverse chronological order starting with the most recent entry.

3. To exit without making changes, press **EXIT**.
Caller ID operation

View dialing options

Although the incoming call log entries have 10 digits (the area code plus the seven-digit number), in some areas, you may need to dial the seven digits only, 1 plus the seven digits, or 1 plus the area code plus the seven digits. You can change and store the number of digits that you dial in the call log.

While reviewing the call log, press # (pound key) repeatedly on the telephone base to show different dialing options for local and long distance numbers before dialing or saving the telephone number in the directory.

Dial a call log entry

1. When in the call log, press ▲ or ▼ to browse the number you wish to call.
2. Lift the handset or press 🔊 SPEAKER.
   
   -OR-
   
   To override automatic line selection, press LINE 1-LINE 4 for the desired line, then lift the handset.

Delete entries

Delete a call log entry:

1. When in the call log, press ▲ or ▼ to browse to the number you wish to delete.
2. Press REMOVE to delete the shown entry from the caller ID history.

Delete all call log entries:

1. When the telephone is idle, press CALL LOG.
   
   -OR-
   
   When the telephone is idle, press MENU/ENTER. Press ▲ or ▼ to scroll to Call log. Press MENU/ENTER.

2. Press REMOVE. The screen displays Delete all calls? Press SKIP to clear all entries in the caller ID history or press REP to exit and leave all entries in the caller ID history intact.
3. To exit without making changes, press EXIT.
Caller ID operation

Save a call log entry to the directory

1. When in the call log, press ▲ or ▼ to browse the desired number to save.

2. The screen displays ENTER=Add. Press MENU/ENTER.

3. When the telephone number appears,
   • Press the dial pad keys to add digits (page 61).
   • Press REMOVE to erase a digit.
   • Press and hold REMOVE to erase all digits.
   • Press REP or SKIP to move the cursor to the left or right.

4. Press MENU/ENTER to move to the name.
   • Press the dial pad keys to add characters (page 61).
   • Press REMOVE to erase a character.
   • Press and hold REMOVE to erase all characters.
   • Press REP or SKIP to move the cursor to the left or right.
   • Press 0 once to enter a space.

5. Press MENU/ENTER to save the new directory entry. There is a confirmation tone. The name and the telephone number appear.
   • If the entry is already saved in the directory, the screen display remains the same and waits for more editing.
   • If there is no caller ID information, you hear an error tone. The number cannot be saved.

-OR-

To exit without making changes, press EXIT.

NOTE: You will need to change how a caller ID number is dialed if the entry does not appear in the correct format. Caller ID numbers might appear with an area code that is not necessary for local calls, or without a 1 that is necessary for long distance calls (see View dialing options on the previous page for more information).
Reasons for missing caller ID information

There are also occasions when other information or no information shows for various reasons:

<table>
<thead>
<tr>
<th>On-screen message</th>
<th>Reason</th>
</tr>
</thead>
<tbody>
<tr>
<td>Private caller</td>
<td>The caller prefers not to show the telephone number and name.</td>
</tr>
<tr>
<td>Unknown caller</td>
<td>Your telephone service provider cannot determine the caller’s name and telephone number. Calls from other countries may also generate this message.</td>
</tr>
</tbody>
</table>
Answering system and voicemail

Your telephone has separate indicators for two different types of voice messages: those left on its built-in answering system and those left at your service provider’s voicemail (fees may apply). Your telephone’s built-in answering system messages and voicemail messages are separate. Each alerts you to new messages differently.

- If you turn on the COVM feature (See COVM on page 53 for more information) and the COVM icon displays on the base screen, your telephone service provider is indicating that it has new voicemail for you. To listen to your voicemail, dial an access number provided by your telephone service provider, followed by a security code or PIN.

- To listen to messages recorded on your digital answering system, press (Messages) on the telephone base (page 78).

Some service providers bundle or combine multiple services like voicemail and call waiting, so you may not be aware that you have voicemail. To check what services you have and how to access them, contact your telephone service provider.

To use your voicemail service rather than the answering system, turn off the answering system. To use the answering system rather than the voicemail service, contact your telephone service provider to deactivate the voicemail service. Use your telephone answering system and voicemail together by setting your built-in answering system to answer before voicemail answers, as described below. To learn how to program your voicemail settings, contact your telephone service provider. Then, if you are on a call, or if the answering system is busy recording a message and you receive another call, the second caller can leave a voicemail message.

Set your answering system to answer calls at least two rings earlier than your voicemail is set to answer. For example, if your voicemail answers after six rings, set your answering system to answer after four rings. Some voicemail providers may program the delay before answering calls in seconds instead of rings. In this case, allow six seconds per ring when determining the appropriate setting.
Setting your system to automatically answer calls

Use this feature to separately set each of the four lines to automatically answer incoming calls in three different ways.

**General mailbox (gen MB only):**

The called line rings on every extension for each incoming call. If there is no answer, the caller is prompted to leave a message in the general mailbox, which a person at any handset can review. The general mailbox stores incoming messages, memos, and two-way conversations (see *Answering system operation* on pages 78-82 for more information).

**Auto attendant (auto att):**

The called line for each incoming call flashes on every extension, but does not ring. Instead, the auto attendant answers. The caller can specify an extension or leave a general mailbox message. When the auto attendant directs a call to an extension but it is not answered, the auto attendant prompts the caller to leave a message for that extension or try another extension.

Each auto attendant can answer only one call at a time. You might want to turn on additional auto attendants in your system so that even when a call on one line is being answered, a second auto attendant can answer another ringing line. You can designate up to four auto attendants in your system (see *Auto attendant operation* on pages 75-77 for more information.)

**Announce only (annc only):**

The called line for each incoming call flashes and rings on every extension. After the number of rings you programmed (see *Number of rings* on page 32), the answering system plays an announcement only and then the call is dropped automatically. The caller is not allowed to specify an extension or leave a message in the general mailbox. You can use a default outgoing announcement or record up to five announcements of your own.

**No answer:**

You can disable automatic answering on any of the telephone lines.

**An example of a 2-line answering system setup**

If you have two phone lines and two or more extensions and you wish to use the auto attendant, then configure both lines to use the auto attendant. Then, if a call comes in while one line is busy, it will still be answered by the auto attendant.

**Line 1:** Auto attendant (2 rings)

**Line 2:** Auto attendant (2 rings)
Setting your system to automatically answer calls

An example of a 4-line answering system setup

If you have four phone lines and many extensions, you can set up the auto attendant to answer up to three simultaneous calls. You can set up the fourth line to ring as a private direct line to a single extension by excluding all others in the Ring group (page 17).

Line 1: Auto attendant (2 rings)
Line 2: Auto attendant (2 rings)
Line 3: Auto attendant (2 rings)
Line 4: General mailbox (4 rings, all but one extension excluded)

Select the answer mode

1. When the telephone is idle, press ANSWER ON for the desired line.
2. Press ▲ or ▼ to scroll to the desired answer mode (Ans->Gen MB only, Ans->Auto att, Ans->Annc only or No answer). Press MENU/ENTER to select the mode. To exit without making changes, press EXIT.

Answering system capacity

You can record up to five new announcements to have different announcements for each line. Each announcement can be up to two minutes.

The announcements of auto attendant, general mailbox and announce only answer mode all require system memory to record, so we suggest recording brief announcements in order to leave more space for messages.

The maximum recording time of all handsets and base is 180 minutes. The actual recording time depends on individual message characteristics. Individual messages can be up to three minutes. Messages remain available for review until you delete them.

If the system memory is full, the screen displays Message full, and you cannot record new messages until old ones have been deleted. Check remaining system space frequently to maintain availability of space for incoming messages.

NOTE: You cannot record an announcement when the telephone system is out of space. You will hear a two-beep alert tone and voice prompt “Memory is full.” Please refer to Remaining space on page 38.
Auto attendant operation

Turn the auto attendant on

1. When the telephone is idle, press ANSWER ON for the desired line to set up.
2. Press ▲ or ▼ to scroll to Ans->Auto att.
3. Press MENU/ENTER to turn on the auto attendant. The current auto attendant announcement plays. The screen displays Auto Attendant ON Play announcement with voice prompt “Hello, this is automatic attendant,” and then the idle screen appears.

-OR-

Press ▲ or ▼ to scroll to No answer to turn the auto attendant off. Press MENU/ENTER to turn off the auto attendant feature for that line.

To exit without making changes, press EXIT.

NOTES:

1. The auto attendant only answers outside calls.
2. The auto attendant does not answer calls when that line is in use.
3. You can press VOL+ or VOL- to adjust the announcement playback volume.

Using the auto attendant

When you set a line to be an auto attendant, it automatically picks up the ringing line after the number of rings you programmed (see Number of rings on page 31), and plays your selected auto attendant announcement.

While the line silently rings, and while the auto attendant is answering and directing a call, the line indicator flashes (page 44). To interrupt the auto attendant, press the flashing line indicator LINE 1-LINE 4 on the telephone base or L 1-L 4 on a cordless handset to talk to the caller on that line. You can also allow the auto attendant to answer the incoming call while you make a new call on another line.

When a caller enters a correct extension number, the auto attendant transfers the call to that extension and announces to the caller, “Please wait.” If the called extension does not answer, the caller is prompted to try another extension or leave a message in a private mailbox for the last attempted extension. The auto attendant attempts to transfer the call up to five times.
Auto attendant operation

If the caller enters an extension number plus the # (pound key) after hearing the announcement, the auto attendant transfers the call to the specified extension. If the call is not picked up after five rings, the caller hears “No one is available to answer the call. To leave a message, press 1. To call another extension, press 2. To call the operator, press star,” and waits five seconds for another entry from the caller. If the caller still hasn’t entered an extension number after hearing this message three times, the auto attendant forwards the call to the general mailbox to leave a message.

If the caller enters an invalid extension number, the auto attendant announces, “Please wait. This number is not assigned. To leave a message, press 1. To call another extension, press 2. To call the operator, press star.”

If the caller enters the * (star key) plus the # (pound key), the auto attendant announces “Calling the operator,” and then transfers the call to the telephone base.

If the caller enters the remote access code while hearing the announcement, the auto attendant stops playing the announcement and the caller can remotely access the general mailbox (See Remote access on page 83 for information).

If the caller does not enter any number after hearing the announcement, the auto attendant announces three times “Hello, this is auto attendant. Please enter your party’s extension, followed by pound (#). If you are using a rotary telephone, please stay on the line. For a company directory, dial star twice.” Then, the auto attendant transfers the call to the general mailbox for the caller to leave a message.

Using multiple auto attendants

Use this feature to set one or more telephone lines to act as auto attendants when the primary auto attendant is turned off or busy.

An auto attendant is busy when someone at that extension is doing any of the following:

• dialing from the directory or call history
• using any of the lines to make or answer a call
• when the answering system is recording a message at that extension

You can choose a particular telephone line to always be the primary auto attendant by setting that line to have the shortest auto attendant pickup delay (number of rings) and setting the other auto attendants to have longer pickup delays (more rings). If the auto attendant pickup delays are the same, incoming calls are distributed randomly to the auto attendants.
Auto attendant operation

Auto attendant flow chart

1. Incoming call
   - AA answers and plays outgoing announcement
     - Caller dials * and # → AA sends call to the telephone base
     - Caller dials extension number and # → AA calls extension
     - Caller dials remote access code → Answering system remote access
     - No caller input → General mailbox records message
2. Person answers call?
   - Yes → Normal call
   - No → Caller enters another extension or records a message
Answering system

Answering system operation

Set general delivery mailbox to answer

1. When the telephone is idle, press ANSWER ON for the desired line.

2. Press ▲ or ▼ to scroll to Ans->Gen MB only.

3. Press MENU/ENTER. The ANSWER ON indicator turns on. The current mailbox announcement plays. The screen displays General Mbox ON Play announcement, and then it returns to the idle screen.

-OR-

To exit without making changes, press EXIT.

NOTE: While previewing the announcement, you can adjust the volume by pressing VOL+ or VOL-. If you do not want to hear the announcement, press EXIT.

Incoming messages

This telephone also accepts COVM recorded by your telephone service provider which you subscribe to for voicemail service (page 53).

New message indication

The (Messages) indicator on the telephone base flashes when there are new or missed messages and memos in the general mailbox.

Message playback

From the telephone base, you can play the messages in both the general mailbox and handset/deskset mailboxes.

If you have new messages, you hear only the new messages (in chronological order). If there are no new messages, the system plays back all the messages (in chronological order).

When playback begins, the total number of messages is announced. Before each message, you hear the date and time of the recording. After the last message, you hear “End of the messages.”

To listen to messages in the general mailbox:

1. While the telephone is idle, press (Messages) on the telephone base.

2. The system announces the number of new or missed messages in the general mailbox.
Answering system operation

3. Press **MENU/ENTER** to select **Play all** to listen to all messages. Press **REP** to repeat the current message; press **REP** twice to listen to the previous message. Press **SKIP** to move to the next message. You hear two beeps at the end of each message playback.

4. Playback ends after playing all the messages, and then returns to the previous menu.

5. Press **(Messages)** again to end the message playback at any time.

**To listen to messages in the handset/deskset mailbox:**

1. When the telephone is idle, press **(Messages)** on the telephone base.
2. Press the one-touch **EXT 1-0** key for the destination extension mailbox.
3. Use the dial pad to enter the four-digit remote access code of the extension. Use **REMOVE** to backspace and delete a digit. Then, press **MENU/ENTER**.
4. Go to Steps 2-5 in the **To listen to messages in the general mailbox** section on the previous page.

**Options during playback**

When a message is playing, you can adjust the playback volume, skip, repeat, or delete the message.

**When a message is playing on the telephone base:**

- Lift the corded handset to listen to the message playback through the handset earpiece. Press **SPEAKER** to switch back to speakerphone.
- Press **VOL+** or **VOL-** to adjust the message playback volume.
- Press **SKIP** to skip to the next message.
- Press **REP** to repeat the current message. Press twice to hear the previous message.
- Press **REMOVE** to delete the message. The system announces “*Message deleted.*”
- Press **(Messages)** to stop playback.

**Delete all old messages**

Use this feature to only delete old (reviewed) messages. You cannot delete new messages until you review them. You cannot retrieve deleted messages.

**Delete all old messages in the general mailbox:**

1. When the telephone is idle, press **(Messages)** on the telephone base.
2. Press ▲ or ▼ to scroll to **Delete all old**. Press **MENU/ENTER**.

3. The screen displays **Delete all old messages? <=No >=Yes**. Press <REP to cancel this operation to return to the previous menu, or press SKIP to remove all old messages from the general mailbox.

**Delete all old messages in the handset/deskset mailbox:**

1. When the telephone is idle, press **CO (Messages)** on the telephone base.
2. Press the one-touch **EXT 1-0** key for the destination extension mailbox.
3. Use the dial pad to enter the four-digit remote access code of the extension. Use **REMOVE** to backspace and delete a digit. Then, press **MENU/ENTER**.
4. Press ▲ or ▼ to scroll to **Delete all old**. Press **MENU/ENTER**.
5. The screen displays **Delete all old messages? <=No >=Yes**. Press <REP to cancel this operation to return to the previous menu, or press SKIP to remove all old messages from the handset mailbox.

**NOTE:** If there are any new or missed messages in the general mailbox, the **CO (Messages)** indicator still flashes after you delete all old messages.

**Transfer message**

When a message is playing in the general mailbox or handset mailbox, you can transfer the message to a single extension, all extensions or the telephone base.

**When a message is playing on the telephone base:**

1. Press **XFER** on the telephone base.
2. Press ▲ or ▼ to scroll to an extension, all extensions or the telephone base, then press **MENU/ENTER**.
   - **OR**
     Press the one-touch **EXT 1-0** key on the telephone base. The message is automatically transferred to the desired extension.

A copy of the message automatically transfers to the desired extension, all extensions or the telephone base. The general mailbox retains the original copy of the message.
Answering system operation

Record and deliver memos

Memos are messages you record into the general mailbox or handset mailbox at the telephone base. You can save, play back, and delete them like incoming messages. You can record a memo as a reminder to yourself, or send a message to other extensions using the answering system.

To record a memo in the general mailbox, then deliver it:

1. When the telephone is idle, press \( \text{Messages} \) on the telephone base.
2. Press \( \Delta \) or \( \nabla \) to scroll to Deliver. Press MENU/ENTER.
3. Press \( \Delta \) or \( \nabla \) to scroll to select the telephone base or a desired registered extension, or select all the registered extensions.
4. Press MENU/ENTER. The system announces “Record after the tone. Press stop when you are done.” There is a reminder beep. The timer starts counting. Lift the corded handset or face the telephone to record your memo.
5. Press MENU/ENTER again to stop recording. The timer stops and the recorded memo automatically plays back. The screen displays 1=Change 2=OK.
6. Press 1 to record that memo again. -OR-
   Press 2 to save the memo and send it to the extension you selected. The system announces “Message transferred to mailbox X,” and then returns to the previous menu or memo.

To record a memo in the handset/deskset mailbox, then deliver it:

1. When the telephone is idle, press \( \text{Messages} \) on the telephone base.
2. Press the one-touch EXT 1-0 key for the destination extension mailbox.
3. Use the dial pad to enter the four-digit remote access code of the extension. Use REMOVE to backspace and delete a digit. Then, press MENU/ENTER.
4. Go to Steps 2-6 in To record a memo in the general mailbox, then deliver it above on this page.
Answering system operation

Play back a memo

Play memos the same way as normal messages (see Message playback on page 78).

Set answering system to play announcement only

1. When the telephone is idle, press ANSWER ON for the desired line.
2. Press MENU/ENTER. The current Announce only announcement plays. The screen displays Announce only ON Play announcement, and then it returns to the idle screen.

   -OR-

   To exit without making changes, press EXIT.

NOTES:

1. The default announcement is “Hello. No one is available to answer your call. Thank you for calling.”
2. While previewing the announcement, you can adjust the volume by pressing VOL+ or VOL-. If you do not want to hear the announcement, press EXIT.

Set general delivery mailbox to not answer

1. When the telephone is idle, press ANSWER ON for the desired line.
2. Press ▲ or ▼ to scroll to No answer. Press MENU/ENTER.

Disable the answering system

1. When the telephone is idle, press ANSWER ON for the desired line to disable.
2. Press ▲ or ▼ to scroll to No answer. Press MENU/ENTER to prevent the answering machine from answering calls on that line.

   -OR-

   To exit without making changes, press EXIT.
Remote access

Use this feature to reach your answering system remotely by dialing your telephone number from any touch-tone telephone.

**To remotely reach the answering system:**

1. Dial your telephone number from any touch-tone telephone.

2. When the system answers, enter the four-digit remote access code (0000 is the default code; see page 34 to change it).

   The system automatically announces the number of messages (new and/or old) if there are any, and then begins to play them.

3. You can also enter the following remote commands.

**Remote commands:**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Press to play to all messages.</td>
</tr>
<tr>
<td>3</td>
<td>Press to delete the current message (during playback).</td>
</tr>
<tr>
<td>4</td>
<td>Press to repeat the current message (during playback).</td>
</tr>
<tr>
<td>After you hear “Repeat” and within five seconds, press 4 again to listen to the previous message (during playback).</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Press to stop and return to the remote commands (during playback).</td>
</tr>
<tr>
<td>6</td>
<td>Press to skip to the next message (during playback).</td>
</tr>
<tr>
<td>7</td>
<td>Press to transfer the current message (during playback).</td>
</tr>
<tr>
<td>✗</td>
<td>Press to end the call.</td>
</tr>
</tbody>
</table>

4. Hang up to end the call and save all messages that have not been deleted.

Cut out the remote access wallet card at the back of this user’s manual for quick reference.

**NOTES:**

1. If you do not enter a valid remote access code, the answering system answers the call as usual and all the voice and digits entered will be recorded as messages stored in your general mailbox.

2. If you do not enter any remote access code, the answering system announces “Thank you for calling,” and the call ends.

3. When there is no new message or all the new messages are played during remote access, you hear a help menu listing all features and commands. If there is no command after the help menu is played three times, the call ends automatically.
Remote access

4. If the memory is full, you hear a two-beep alert tone and the answering system announces, “Memory is full.” The telephone base screen displays **Message full** and you cannot record new messages until old ones have been deleted. Check the system remaining space (page 38) frequently to maintain availability of space for incoming messages.

5. If you press **4** within five seconds of each message playback start, the previous message plays instead of repeating the current message.
Cordless headset operation

The AT&T compatible DECT 6.0 cordless headset (AT&T model TL7600) functions as an extension of the telephone base. The cordless headset cannot be used for PTT calls. It cannot initiate an intercom call, but can receive one if it is called by the telephone base, a handset or a deskset.

To register and deregister a TL7600 headset to the SynJ SB67158 telephone base, please refer to pages 12-13. To view the TL7600 manual, visit our website at www.telephones.att.com, or call 1 (888) 915-2007.

In Canada, dial 1 (866) 288-4268.

Cordless headset extension number

The cordless headset is always assigned extension number 0 regardless of how many handsets are registered.

By pressing the ON/OFF button on the cordless headset, you can see the extension 0 icon on the telephone base screen.

Switch between corded or cordless handset, telephone speakerphone and cordless headset

Use the following instructions to switch between the telephone base components (corded handset, speakerphone, corded headset and cordless headset). You must use the intercom system (page 54) to switch between the base and the cordless handsets.

To switch from corded handset, corded headset, or speakerphone to cordless headset:

During a call, press the ON/OFF button on the cordless headset.

To switch from cordless headset to corded handset, corded headset, or speakerphone:

During a call, lift the corded handset, or press HEADSET, or press ➔ SPEAKER on the telephone base.

Taking care of your telephone

- Your telephone base contains sophisticated electronic parts, so you must treat it with care.
- Avoid rough treatment.
- Place the corded handset down gently.
- Save the original packing materials to protect your telephone base if you ever need to ship it.

Avoid water

- You can damage your telephone base if it gets wet. Do not use the corded handset in the rain, or handle it with wet hands. Do not install the telephone base near a sink, bathtub or shower.

Electrical storms

- Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electric appliances during storms.

Cleaning your telephone

- Your telephone base has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap.
- Do not use excess water or cleaning solvents of any kind.

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone base should fall into water, DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND TELEPHONE LINE CORDS FROM THE WALL. Pull the unit out by the unplugged cords.
Important safety information

This symbol is to alert you to important operating or servicing instructions that may appear in this user’s manual. Always follow basic safety precautions when using this product to reduce the risk of injury, fire, or electric shock.

Safety information

• Read and understand all instructions in the user’s manual. Observe all markings on the product.
• Avoid using a telephone during a thunderstorm. There may be a slight chance of electric shock from lightning.
• Do not use the telephone to report a gas leak in the vicinity of the leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. The user should not plug the phone into a power outlet, and should not put a charged handset into the cradle, if the phone is located in an environment containing concentrations of flammable or flame-supporting gases, unless there is adequate ventilation. A spark in such an environment could create a fire or explosion. Such environments might include: medical use of oxygen without adequate ventilation; industrial gases (cleaning solvents; gasoline vapors; etc.); a leak of natural gas; etc.
• Do not use this product near water, or when you are wet. For example, do not use it in a wet basement or shower, or next to a swimming pool, bathtub, kitchen sink, or laundry tub. Do not use liquids or aerosol sprays for cleaning. If the product comes in contact with any liquid, unplug any line or power cord immediately. Do not plug the product back in until it has dried thoroughly.
• Install this product in a protected location where no one can trip over any line or power cords. Protect cords from damage or abrasion.
• If this product does not operate normally, see the Troubleshooting section on pages 99-105 of this user’s manual. If you cannot solve the problem, or if the product is damaged, refer to the Limited warranty section on pages 96-97. Do not open this product except as directed in your user’s manual. Opening the product or reassembling it incorrectly may expose you to hazardous voltages or other risks.
• Replace backup battery only as described in your user’s manual (see page 9). Do not burn or puncture batteries — they contain caustic chemicals.
• This power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, an under-the-table or cabinet outlet.

Caution: Use only the power adapter provided with this product. To obtain a replacement, visit our website at www.telephones.att.com or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268.
Important safety information

Especially about cordless telephones

- Electrical power: The telephone base must be connected to a working electrical outlet. The electrical outlet should not be controlled by a wall switch. Calls cannot be made from the handset if the telephone base is unplugged, switched off or if the electrical power is interrupted.
- Power adapter: The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.

Precautions for users of implanted cardiac pacemakers

Cardiac pacemakers (applies only to digital cordless telephones):

Wireless Technology Research, LLC (WTR), an independent research entity, led a multidisciplinary evaluation of the interference between portable wireless telephones and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians that:

Pacemaker patients

- Should keep wireless telephones at least six inches from the pacemaker.
- Should NOT place wireless telephones directly over the pacemaker, such as in a breast pocket, when it is turned ON.
- Should use the wireless telephone at the ear opposite the pacemaker.

WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless telephones.

Especially about telephone answering systems

Two-way recording: This unit does not sound warning beeps to inform the other party that the call is being recorded. To ensure that you are in compliance with any federal or state regulations regarding recording a telephone call, you should start the recording process and then inform the other party that you are recording the conversation.

SAVE THESE INSTRUCTIONS
Mesures de sécurité importantes

Ce symbole vous alertera d’informations importantes ou d’instructions d’entretien pouvant apparaître dans ce guide d’utilisation. Respectez toujours les mesures de sécurité et de sécurité de base lorsque vous utilisez ce produit, afin de réduire les risques de blessures, d’incendie, ou d’électrocution.

Information relative à la sécurité

- Veuillez lire et comprendre toutes les instructions de ce guide d’utilisation. Relectez toutes les inscriptions apparaissant sur le produit.
- Évitez d’utiliser le téléphone pendant un orage. Il pourrait y avoir un faible risque d’électrocution.
- N’utilisez pas un téléphone près d’une fuite de gaz. Dans certaines circonstances, une flammèche pourrait se produire lorsque l’adaptateur est branché à une prise de courant, ou lorsque le combiné est déposé sur son chargeur. Ceci est un événement fréquent associé avec la fermeture d’un circuit électrique. L’utilisateur ne devrait pas brancher un téléphone dans une prise de courant, et ne devrait pas déposer un combiné chargé dans le chargeur, si le téléphone se trouve dans un environnement comportant une concentration de gaz inflammables ou ignifuges, à moins de se trouver dans un endroit où la ventilation est adéquate. Une flammèche dans de tels environnements pourrait provoquer une explosion. De tels environnements peuvent comprendre : les endroits où de l’oxygène à des fins médicales est utilisé sans ventilation adéquate; des endroits où se trouvent des gaz industriels (dissolvants de nettoyage, des vapeurs de gazoline, etc.), une fuite de gaz naturel, etc.
- N’utilisez pas ce produit près de l’eau ou lorsque vous êtes mouillés. Par exemple, ne l’utilisez pas dans des sous-sols humides ou sous la douche, ou près d’une piscine, d’un bain, d’un évier de cuisine, ou d’une cuve de lavage. N’utilisez pas de liquides, ou de vaporisateurs aérosol de nettoyage. Si le produit entre en contact avec du liquide, débranchez immédiatement le fil téléphonique ou le cordon d’alimentation. Ne rebranchez pas le produit avant qu’il soit complètement sec.
- Installez cet appareil dans un endroit protégé où personne ne peut trébucher sur les cordons d’alimentation ou la ligne téléphonique. Protégez les câbles contre les dommages ou l’abrasion.
- Si le produit ne fonctionne pas correctement, consultez la section Dépannage (Troubleshooting) des pages 99-105 de ce guide d’utilisation. Si vous ne pouvez pas régler le problème, ou si le produit est endommagé, consultez la section Garantie limitée (Limited warranty) des pages 96-97. N’ouvrrez pas ce produit, sauf tel qu’indiqué dans le guide d’utilisation. L’ouverture du produit ou le remontage inadéquat pourrait vous exposer à des tensions dangereuses ou autres dangers.
- Remplacez les piles uniquement tel que décrit dans votre guide d’utilisation (page 9). N’incinérez pas et ne percez pas les piles — elles contiennent des produits chimiques caustiques.
- L’adaptateur de courant est conçu pour être orienté verticalement ou installé sur le plancher. Les broches ne sont pas conçues pour se maintenir en place si la fiche est branchée dans une prise de courant au plafond, sous la table ou sous une armoire.

Spécifiquement en rapport avec les téléphones sans fil

- Alimentation électrique : La base de ce téléphone sans fil doit être branchée à une prise de courant électrique fonctionnelle. La prise électrique ne doit pas être contrôlée par un interrupteur mural. Les appels ne peuvent pas être effectués à partir du socle du téléphone n’est pas branchée, si elle est hors fonction ou si le courant électrique est coupé.
- L’adaptateur de courant : L’adaptateur de courant est conçu pour être orienté verticalement ou installé sur le plancher. Les broches ne sont pas conçues pour se maintenir en place si la fiche est branchée dans une prise de courant au plafond, sous la table ou sous une armoire.

Mesures préventives pour les utilisateurs de stimulateurs cardiaques implantés dans l’organisme

Stimulateurs cardiaques (ne s’applique qu’aux téléphones sans fil numériques) :
L’organisme ‘Wireless Technology Research, LLC (WTR)’, une firme de recherche indépendante, a mené une évaluation pluridisciplinaire des interférences entre les téléphones sans fil portatifs et les stimulateurs cardiaques implantés dans l’organisme. Appuyée par l’Administration des aliments et drogues (FDA) des États-unis, la firme WTR recommande aux médecins :

Avis aux détenteurs de stimulateurs cardiaques
- Ils doivent tenir le téléphone sans fil à une distance d’au moins six pouces du stimulateur cardiaque.
- Ils ne doivent PAS placer le téléphone sans fil directement sur le stimulateur cardiaque, tel que dans une poche de chemise, lorsque celui-ci est en fonction.
- Ils doivent utiliser le téléphone sans fil en l’appuyant sur l’oreille qui se trouve dans la direction opposée au stimulateur cardiaque.

L’étude effectuée par l’organisme WRS n’a pas identifié de risque pour les détenteurs de simulateurs cardiaques causé par les gens qui utilisent un téléphone sans fil à proximité de ceux-ci.

Spécifiquement en rapport avec les répondeurs téléphoniques

Enregistrement deux voies : Cet appareil n’émet pas de bips d’avertissement qui permettent de prévenir l’autre partie que vous enregistrez la conversation. Pour assurer votre conformité aux règlements fédéraux ou provinciaux en rapport avec les enregistrements des conversations téléphoniques, vous devriez informer l’autre partie lorsque vous activez l’enregistrement.

CONSERVEZ CES INSTRUCTIONS
Appendix

FCC part 68 and ACTA

This equipment complies with Part 68 of the FCC rules and with technical requirements adopted by the Administrative Council for Terminal Attachments (ACTA). The label on the back or bottom of this equipment contains, among other things, a product identifier in the format US: AAAEQ###TXXXX. This identifier must be provided to your telephone service provider upon request.

The plug and jack used to connect this equipment to premises wiring and the telephone network must comply with the applicable Part 68 rules and technical requirements adopted by ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. An RJ11 jack should normally be used for connecting to a single line and an RJ14 jack for two lines. See Installation Instructions in the user’s manual.

The Ringer Equivalence Number (REN) is used to determine how many devices you may connect to your telephone line and still have them ring when you are called. The REN for this product is encoded as the 6th and 7th characters following the US: in the product identifier (e.g., if ## is 03, the REN is 0.3). In most, but not all areas, the sum of all RENs should be five (5.0) or less. For more information, please contact your telephone service provider.

This equipment may not be used with Party Lines. If you have specially wired alarm dialing equipment connected to telephone line, ensure the connection of this equipment does not disable your alarm equipment. If you have questions about what will disable the alarm equipment, consult your telephone service provider or a qualified installer.

If this equipment is malfunctioning, it must be unplugged from the modular jack until the problem has been corrected. Repairs to this telephone equipment can only be made by the manufacturer or its authorized agents. For repair procedures, follow the instructions outlined under the Limited Warranty.

If this equipment is causing harm to the telephone network, the telephone service provider may temporarily discontinue your telephone service. The telephone service provider is required to notify you before interrupting service. If advance notice is not practical, you will be notified as soon as possible. You will be given the opportunity to correct the problem and the telephone service provider is required to inform you of your right to file a complaint with the FCC. Your telephone service provider may make changes in its facilities, equipment, operation, or procedures that could affect the proper functioning of this product. The telephone service provider is required to notify you if such changes are planned.

If this product is equipped with a corded or cordless handset, it is hearing aid compatible.

If this product has memory dialing locations, you may choose to store emergency telephone numbers (e.g., police, fire, medical) in these locations. If you do store or test emergency numbers, please:

Remain on the line and briefly explain the reason for the call before hanging up.
Perform such activities in off-peak hours, such as early morning or late evening.

Industry Canada

This device complies with Industry Canada license-exempt RSS standard(s).
Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Privacy of communications may not be ensured when using this telephone.
The term “IC:” before the certification/registration number only signifies that the Industry Canada technical specifications were met.
The Ringer Equivalence Number (REN) for this terminal equipment is 0.1. The REN is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.
This product meets the applicable Industry Canada technical specifications.
FCC part 15

This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Privacy of communications may not be ensured when using this telephone.

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FCC criteria. The handset may be safely held against the ear of the user. The telephone base shall be installed and used such that parts of the user’s body other than the hands are maintained at a distance of approximately 20 cm (8 inches) or more. If you choose to use a clipping device, please make sure to only use the supplied AT&T belt clip.

This Class B digital apparatus complies with Canadian requirement: CAN ICES-3 (B)/NMB-3(B).
Limited warranty

The AT&T brand is used under license - any repair, replacement or warranty service, and all questions about this product should be directed to: In the United States of America, visit www.telephones.att.com or call 1 (888) 915-2007. In Canada, call 1 (866) 288-4268.

1. What does this limited warranty cover?
The manufacturer of this AT&T branded product warrants to the holder of a valid proof of purchase (“CONSUMER” or “you”) that the product and all accessories provided in the sales package (“PRODUCT”) are free from defects in material and workmanship, pursuant to the following terms and conditions, when installed and used normally and in accordance with the PRODUCT operating instructions. This limited warranty extends only to the CONSUMER for products purchased and used in the United States of America and Canada.

2. What will be done if the PRODUCT is not free from defects in materials and workmanship during the limited warranty period (“materially defective PRODUCT”)?
During the limited warranty period, the manufacturer’s authorized service representative will repair or replace at the manufacturer’s option, without charge, a materially defective PRODUCT. If the manufacturer repairs the PRODUCT, they may use new or refurbished replacement parts. If the manufacturer chooses to replace the PRODUCT, they may replace it with a new or refurbished PRODUCT of the same or similar design. The manufacturer will retain defective parts, modules, or equipment. Repair or replacement of the PRODUCT, at the manufacturer’s option, is your exclusive remedy. The manufacturer will return repaired or replacement products to you in working condition. You should expect the repair or replacement to take approximately 30 days.

3. How long is the limited warranty period?
The limited warranty period for the PRODUCT extends for TWO (2) YEARS from the date of purchase. If the manufacturer repairs or replaces a materially defective PRODUCT under the terms of this limited warranty, this limited warranty also applies to repaired or replacement PRODUCT for a period of either (a) 90 days from the date the repaired or replacement PRODUCT is shipped to you or (b) the time remaining on the original two-year limited warranty; whichever is longer.

4. What is not covered by this limited warranty?
This limited warranty does not cover:
• PRODUCT that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water, or other liquid intrusion; or
• PRODUCT that has been damaged due to repair, alteration, or modification by anyone other than an authorized service representative of the manufacturer; or
• PRODUCT to the extent that the problem experienced is caused by signal conditions, network reliability or cable or antenna systems; or
• PRODUCT to the extent that the problem is caused by use with non-AT&T accessories; or
• PRODUCT whose warranty/quality stickers, PRODUCT serial number plates or electronic serial numbers have been removed, altered or rendered illegible; or
• PRODUCT purchased, used, serviced, or shipped for repair from outside the United States of America or Canada, or used for commercial or institutional purposes (including but not limited to products used for rental purposes); or
• PRODUCT returned without a valid proof of purchase (see item 6); or
• Charges for installation or setup, adjustment of customer controls, and installation or repair of systems outside the unit.
5. How do you get warranty service?

To obtain warranty service in the United States of America, visit www.telephones.att.com or call 1 (888) 915-2007. In Canada, call 1 (866) 288-4268. NOTE: Before calling for service, please review the user’s manual; a check of the PRODUCT’s controls and features may save you a service call.

Except as provided by applicable law, you assume the risk of loss or damage during transit and transportation and are responsible for delivery or handling charges incurred in the transport of the PRODUCT(s) to the service location. The manufacturer will return repaired or replaced PRODUCT under this limited warranty to you. Transportation, delivery or handling charges are prepaid. The manufacturer assumes no risk for damage or loss of the PRODUCT in transit. If the PRODUCT failure is not covered by this limited warranty, or proof of purchase does not meet the terms of this limited warranty, the manufacturer will notify you and will request that you authorize the cost of repair prior to any further repair activity. You must pay for the cost of repair and return shipping costs for the repair of products that are not covered by this limited warranty.

6. What must you return with the PRODUCT to get warranty service?

You must:

• Return the entire original package and contents including the PRODUCT to the service location along with a description of the malfunction or difficulty; and

• Include a “valid proof of purchase” (sales receipt) identifying the PRODUCT purchased (PRODUCT model) and the date of purchase or receipt; and

• Provide your name, complete and correct mailing address, and telephone number.

7. Other limitations

This warranty is the complete and exclusive agreement between you and the manufacturer of this AT&T branded PRODUCT. It supersedes all other written or oral communications related to this PRODUCT. The manufacturer provides no other warranties for this PRODUCT. The warranty exclusively describes all of the manufacturer’s responsibilities regarding the PRODUCT. There are no other express warranties. No one is authorized to make modifications to this limited warranty and you should not rely on any such modification.

State/Provincial Law rights: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state or province to province.

Limitations: Implied warranties, including those of fitness for a particular purpose and merchantability (an unwritten warranty that the PRODUCT is fit for ordinary use) are limited to two years from date of purchase. Some states/provinces do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. In no event shall the manufacturer be liable for any indirect, special, incidental, consequential, or similar damages (including, but not limited to lost profits or revenue, inability to use the PRODUCT or other associated equipment, the cost of substitute equipment, and claims by third parties) resulting from the use of this PRODUCT. Some states/provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Please retain your original sales receipt as proof of purchase.

### SynJ SB67158 small business system disclaimer range 980 feet

Open range test was performed by Wyle Laboratories, an independent commercial test facility. “Up to 980 feet” repeater range refers to the maximum open field range. Actual range may vary depending on intervening obstacles. Maximum operable range distances are based on all-indoor use.

### DECT 6.0 digital technology

The AT&T DECT 6.0 products offer unsurpassed range performance and sound clarity. This is achieved through a unique antenna design and advances in noise-filtering technology. An independent laboratory has confirmed that AT&T DECT 6.0 products perform up to 45% better in range competitions. Now, calls can be taken in the basement, backyard and garage with exceptional sound quality.

### Telephone operating range

This cordless telephone operates within the maximum power allowed by the Federal Communications Commission (FCC). Even so, this handset and telephone base can communicate over a certain distance — which can vary with the locations of the telephone base and handset, the weather, and the construction of your building.

### Redefining long range coverage and clarity

This telephone base comes with two antennas that gives much better clarity and covers a longer range than before. For even greater range, add optional repeaters (AT&T model SynJ SB67128).
Appendix

Troubleshooting

If you have difficulty with your telephone, please try the following suggestions. For customer service, visit our website at www.telephones.att.com or call 1 (888) 915-2007. In Canada, dial 1 (866) 288-4268.

My telephone base doesn’t work at all.

- Make sure the power cord is securely plugged in.
- Make sure you plug the telephone line cord securely and firmly into the telephone base and the telephone wall jack.
- Reset the telephone base. Unplug the electrical power. Wait approximately 15 seconds, then plug it back in. Allow up to one minute for the telephone base to reset.
- Other electronic products such as HAM radios and other DECT phones, can cause interference with your cordless phone. Try installing your phone as far away as possible from these types of electronic devices.
- You may need to purchase four AA alkaline batteries as backup battery to make the telephone base work in the event of a power failure. Please refer to Optional backup battery installation on page 9 in this user’s manual.

I cannot get a dial tone from the corded handset.

- First try all the suggestions, as mentioned above.
- Make sure you plug the handset cord securely and firmly into the HANDSET jack on the telephone base and the corded handset.
- If the previous suggestions do not work, disconnect the telephone base from the telephone jack and connect to a different telephone. If there is no dial tone on that telephone either, the problem is in your wiring or local service. Contact your telephone service provider.
- Your line cord might be malfunctioning. Try installing a new line cord.

I cannot dial out.

- First try all the suggestions, as mentioned above.
- Make sure you have a dial tone before dialing. The corded handset might take a second or two to connect the telephone base and produce a dial tone. This is normal. Wait an extra second before dialing.
- Eliminate any background noise. Noise from a television, radio or other appliances might cause the telephone to not dial out properly. If you cannot eliminate the background noise, first try muting the corded handset before dialing, or dialing from another room by a cordless handset with less background noise.
- If the other telephones in your building are having the same problem, contact your telephone service provider.
Appendix

Troubleshooting

My telephone base isn’t performing normally.

- Make sure you plug the power cord securely into the telephone base. Plug the power adapter into a different working electrical outlet without a wall switch.
- Reset the telephone base. Unplug the electrical power and remove all the batteries. Wait 15 seconds, then plug the power adaptor back in and install the batteries again. Allow up to one minute for the telephone base to reset.
- Other electronic products such as HAM radios and other DECT phones, can cause interference with your cordless phone. Try installing your phone as far away as possible from these types of electronic devices.

I get noise, static, or weak signals even when I’m near the telephone base.

- If you subscribe to high-speed Internet service (DSL - digital subscriber line) through your telephone lines, you must install a DSL filter between each telephone line cord and telephone wall jack. The filter prevents noise and caller ID problems as a result of DSL interference. Please contact your DSL service provider for more information about DSL filters.
- You may be able to improve the performance of your telephone base by installing your new telephone base as far as possible from any other existing corded or cordless telephone system that may already be installed.
- Other electronic products such as HAM radios and other DECT phones, can cause interference with your cordless phone. Try installing your phone as far away as possible from these types of electronic devices.
- Do not install this telephone base near a microwave oven or on the same electrical outlet. You might experience decreased performance while the microwave oven is operating.
- If you plug your telephone in with a modem or a surge protector, plug the telephone base (or modem/surge protector) into a different location. If this does not solve the problem, relocate your telephone base or modem farther apart from one another, or use a different surge protector.
- Relocate your telephone to a higher location. The telephone might have better reception in a high area.
- If the other telephones in your building are having the same problem, contact your telephone service provider.
Troubleshooting

I experience poor sound quality when using the speakerphone.

- For increased sound quality while using the telephone speakerphone, place the telephone base on a flat surface.
- Excessive background noise will cause a speakerphone to fade in and out. Try controlling the background noise by turning off any audio devices near the speakerphone. Also, try to avoid interrupting the person at the other end of the conversation while they are speaking. If background noise cannot be controlled, you should stop speakerphone operation and return to normal corded handset mode.
- When using a speakerphone, controlling background noise in your environment is essential. While you are listening to your party, press MUTE to temporarily turn your microphone off. When it is your turn to speak, remember to press MUTE again to turn the microphone on.

I hear other calls while using my telephone.

- Disconnect the telephone base from the telephone jack, and plug in a different telephone. If you still hear other calls, call your telephone service provider.

My telephone base does not ring when I receive a call.

- Make sure that the ringer is not off. Refer to the section on ringer selection in this user’s manual.
- Make sure you plug in the telephone line cord securely into the telephone base and the telephone jack. Make sure you plug in the power cord securely.
- You may have too many extension telephones on your telephone line to allow all of them to ring simultaneously. Try unplugging some of the other telephones.
- If the other telephones in your building are having the same problem, contact your telephone service provider.
- Test a working telephone at the telephone jack. If another telephone has the same problem, contact your telephone service provider.
- Other electronic products such as HAM radios and other DECT phones, can cause interference with your cordless phone. Try installing your phone as far away as possible from these types of electronic devices.
- Your line cord might be malfunctioning. Try installing a new line cord.
Troubleshooting

My calls cut in and out while I’m using my corded handset.
- Other electronic products such as HAM radios and other DECT phones, can cause interference with your cordless phone. Try installing your phone as far away as possible from these types of electronic devices.
- Do not install this telephone base near a microwave oven or on the same electrical outlet. You might experience decreased performance while the microwave oven is operating.
- If you plug your telephone base in with a modem or surge protector, plug the telephone base (or modem/surge protector) into a different location. If this does not solve the problem, relocate your telephone base or modem farther apart from one another, or use a different surge protector.
- Relocate your telephone base to a higher location. The telephone base might have better reception when installed in a high area.
- If the other telephones in your building are having the same problem, contact your telephone service provider.
- Excessive background noise will cause a speakerphone to fade in and out. Try controlling the background noise by turning off any audio devices near the speakerphone. Also, try to avoid interrupting the person at the other end of the conversation while they are speaking. If background noise cannot be controlled, you should stop speakerphone operation and return to normal handset mode.
- When using a telephone base speakerphone, controlling background noise in your environment is essential. While you are listening to your party, press MUTE to temporarily turn your microphone off. When it is your turn to speak, remember to press MUTE again to turn the microphone on.

My caller ID isn’t working.
- Caller ID is a subscription service. You must subscribe to this service from your telephone service provider for this feature to work on your telephone base.
- The caller must be calling from an area that supports caller ID.
- Both your and your caller’s telephone service providers must use caller ID compatible equipment.
- If you subscribe to high-speed Internet service (DSL - digital subscriber line) through your telephone lines, you must install a DSL filter between each telephone line cord and telephone wall jack. The filter prevents noise and caller ID problems resulting from DSL interference. Please contact your DSL service provider for more information about DSL filters.
Troubleshooting

System does not receive caller ID when on a call.
- Make sure you subscribe to caller ID with call waiting features from your telephone service provider. Caller ID feature works only if both you and the caller are in areas offering caller ID service, and if both telephone service providers use compatible equipment.

The answering system is recording incomplete messages.
- If a caller leaves a very long message, part of it may be lost when the system disconnects the call after three minutes.
- If the caller pauses for longer than six seconds, the system stops recording and disconnects the call.
- If the system’s memory becomes full during a message, the system stops recording and disconnects the call.
- If the caller’s voice is very soft, the system may stop recording and disconnect the call.

I have difficulty hearing messages.
- Press VOL+ to increase the speaker volume on the telephone base.

System does not answer after the correct number of rings.
- Make sure that the answering system is on (page 74).
- If toll saver is selected, the number of rings changes to two when there are new messages waiting (page 32).
- If the memory is full or if the system is off, the answering system answers after 10 rings.
- In some cases, the answering system is affected by the ringing system used by your telephone service provider.
- If you subscribe to voicemail service, change the number of rings so that your answering system answers before your voicemail answers (page 72). To determine how many rings activate your voicemail, contact your telephone service provider.
- If there is a fax machine connected to the same telephone line, try disconnecting the fax machine. If that solves the problem, consult your fax machine documentation for information on compatibility with answering systems.
Appendix

Troubleshooting

System does not record messages.
• Make sure the answering system is on (page 74).
• Make sure the memory of the answering system is not full. Please refer to the Remaining space section on page 38 in the user’s manual. When the answering system memory is full, it does not record new messages until some old messages are deleted.
• If you subscribe to voicemail service, change the number of rings so that your answering system answers before your voicemail answers (page 72). To determine how many rings activate your voicemail, contact your local telephone service provider.
• If there is a fax machine connected to the same telephone line, try disconnecting the fax machine. If that solves the problem, consult your fax machine documentation for information on compatibility with answering systems.

System does not respond to remote commands.
• Make sure to enter your remote access code correctly (page 83).
• Make sure you are calling from a touch-tone telephone. When you dial a number, you should hear tones. If you hear clicks, the telephone is not a touch-tone telephone and cannot activate the answering system.
• The answering system may not detect the remote access code while your announcement is playing. Try waiting until the announcement is over before entering the code.
• There may be interference on the telephone line you are using. Press dial pad keys firmly.

Outgoing announcement is not clear.
• When you record your announcement, make sure you speak in a normal tone of voice, about nine inches from the telephone base.
• Make sure there is no background noise (TV, music, etc.) while recording.

COVM shows on the screen display and I do not know why.
• Your telephone has voicemail indication that is separate from the built-in answering system. If COVM appears on the display, then your telephone has received a signal from your telephone service provider. Contact your telephone service provider for more information on how to access your voicemail.
Appendix

Troubleshooting

I cannot retrieve voicemail messages.
• Your telephone has both a built-in answering system and voicemail indication. They are independent features and each alerts you to new messages differently (page 72). If you subscribe to voicemail service from your telephone service provider, contact your telephone service provider for more information on how to access your voicemail.

I have problems recording music or voice messages.
• If you are using an audio device, make sure the audio cable has been firmly plugged into your telephone and your audio device.
• If you are using the corded handset, make sure the corded handset has been firmly plugged into the telephone base.

I subscribe to a nontraditional telephone service that uses my computer to establish connections, and my telephone doesn’t work.
• Make sure your computer is powered on.
• Make sure your Internet connection is working properly.
• Make sure that the software is installed and running for your nontraditional telephone service.
• Make sure to plug your USB telephone adapter into a dedicated USB port on your computer. Do not plug it into a multiple port USB hub (USB splitter) that is not powered.
• In a few rare instances, the USB port on your computer may not have enough power. Try using a USB hub with its own external power supply.
• If you are using a firewall, it may prevent access to your nontraditional telephone service provider. Contact your service provider for more information.

Common cure for electronic equipment.
If the telephone base does not seem to be responding normally, do the following (in the order listed):
• Disconnect the power to the telephone base.
• Disconnect the backup batteries.
• Wait a few minutes.
• Connect power to the telephone base.
• Install the backup batteries again.
• Wait for reestablishing the connection with the telephone base. Allow up to one minute for this to take place.
